PG&E Update on Natural Gas Line 147

June 17, 2016 – San Carlos, CA – Beginning Tuesday, June 21, 2016, Pacific Gas and Electric Company (PG&E) will be inspecting and working on sections of the underground pipe of Natural Gas Line 147 along Brittan Avenue between Alameda de las Pulgas and Cordilleras Avenue in San Carlos. Work will take place Monday through Friday during normal business hours and on Saturdays as needed. This work is part of the planned inspection work being performed along Line 147.

PG&E is advising residents to be aware of increased truck traffic and crews as well as contractors conducting excavation work. Customers in the area are being notified with mailed letters, phone calls and in-person contact. As a precaution, PG&E has temporarily lowered pressure on the section of the pipeline until the inspections and any necessary repair work have been completed. PG&E does not expect the work to impact service to its customers.

Questions regarding the project should be directed to PG&E representative Francisco Ybarra at 650-730-7057 or via email at gasprojectinfo@pge.com.
