File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Solvents, Trichloroethylene (TCE), Gasoline, Toluene
Site History: Previous site address 306 Industrial Way. Site developed in 1961 with a 124,000 sf commercial building. Automotive company from 1970 to 1975. A moving storage company; 1975 89 Automotive Enterprises (fiberglass manufacturing and refinishing of Corvette body panels and parts); since 1989 the site has been occupied by B&H Technical Ceramics (cutting and finishing of industrial. Tubular ceramics). Removal of two 5,000 gal TPG-g tanks 4/1989. TPH-G up to 390 mg/kg and toluene up to 330 mg/kg found in soil samples. One MW installed next to the tank pit in May 1989; soil sample R-2 taken at 5.5 ft bgs contained toluene up to 5,000 mg/kg; a GW sample from the MW contained TCE up to 0.870 mg/l, 1,2 DCE 0.033 mg/l, and toluene 0.240 mg/l. According to the 6/1990 Wahler Associates Rpt. a potential for an off-site migration of VOCs since many neighboring sites have VOCs contamination in soil & GW.

Violations:

Site ID: 96845
Site Name: B & H TECHNICAL CERAMICS INC
Violation Date: 07-02-2018
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)

Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: Returned to compliance on 05/13/2019. Complete an assessment of the wastewater treatment system hazardous waste storage tank every five years. This tank assessment is due at this time.

Site ID: 359572
CERS ID: 10647157
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 359572
Site Name: AW COLLISION AUTOBAHN
Violation Date: 05-21-2019
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 11/21/2019. There was a spill of oil/antifreeze on the top of the antifreeze drum and there was standing fluid in the secondary containment pallet that the oil and coolant drums were on. Have the fluid cleaned up from the top of the drum and the containment pallet and provide documentation to SMCUPA within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 359572
Site Name: AW COLLISION AUTOBAHN
Violation Date: 05-09-2017
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 03/02/2018. Several used oil filters were observed in a cardboard box in the back of the lot by the used oil and coolant drums. Marvin stated that these were from personal oil changes being performed on the weekend and are not a typical waste stream for the facility. All oil filters must be in a closed container and labeled as used oil filters and with their accumulation start date. Paper filters and metal filters must be separated and disposed of separately. Ensure these filters are stored and labeled properly and provide evidence to SM CUPA within 30 days.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 07/16/2019. Several manifests are missing their final copies from the TSDf back to the generator. Contact your hauler and/or the TSDf and obtain copies of these final manifests and provide copies to SMCUPA within 30 days. Manifest numbers and dates listed below: 017345970JJK from 10/2/2018 018154593JJK from 10/12/2018 019242571JJK from 2/18/2019

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 03/01/2018. The waste oil and coolant and the Argon/CO2 have moved. Update the map to reflect the actual location of these items. Additionally add the detail soap to the map.

Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 359572
Site Name: AW COLLISION AUTOBAHN
Violation Date: 05-21-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 11/21/2019. According to the records on site, the last pickup of waterborne paint waste was on 10/2/2018, and the accumulation start date on the drum was listed as Novmeber 2018. Hazardous waste must be disposed of every 180 days since the facility appears to be a small quantity generator. Have this waste picked up

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/21/2019. At the time of the inspection the waste oil drum was missing an accumulation start date. The waste solvent drum had a start date, but the year was not legible and the physical state and hazard was not completed. The waste waterborne drum had two different start dates with no year indicated on one. Accumulation start dates must be entered on the drums at the time the first drop enters the containers. The waste solvent drum and the waste waterborne drum had the labels covered with opaque paper so the labels were protected, but not able to be read without removing the paper. Use clear sheet protectors if you need to protect the labels. Provide all the required information on the hazardous waste labels and provide documentation of proper labeling to SMCUPA within 30 days.

Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 359572
Site Name: AW COLLISION AUTOBAHN
Violation Date: 05-09-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 03/01/2018. There is a 55 gallon drum of soap in the detail area that is not reported on the HMBP. Add this to the inventory and the map. Additionally there were 4 cylinders of Argon/CO2 on site. The inventory states there is only one cylinder. Update the inventory to include all on site storage and ensure all compress gas cylinders are secured.

Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 359572
Site Name: AW COLLISION AUTOBAHN
Violation Date: 05-21-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 07/18/2019. Update the quantities of compressed Argon/CO2 on site. The inventory says the largest container is 60 cubic feet and the maximum storage capacity is 125 cubic feet. At the time of the inspection there were 2 cylinders on site and the label stated each cylinder contained 310 cubic feet. Update the entry for the Argon/CO2 and resubmit within 30 days.

Violation Date: 05-09-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 03/02/2018. The waste oil and coolant drums were labeled, but they were missing their accumulation start date. Ensure all waste is labeled with the start date as soon as the first drop enters the drum. Provide proof of proper labeling to SM CUPA within 30 days.

Violation Date: 05-07-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/05/2015. Labels were on waste paint containers, but all information listed 500 Harbor as generator. All labels must be filled out with new location address and EPA ID#. A small drum of oil outside next to waste paint had no label. A small 16 gallon drum inside next to waste paint had no label and a small 16 gallon drum outside the compressor area had a Haz Waste label that was not filled out. Accumulation start dates must be added to all Haz Waste containers. 7/13/2015 - NOV sent

Local Agency: SAN MATEO COUNTY LOP
File Location: Local Agency
Local Case Number: 770002
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Extracted from Stantec's September 21, 2009 Quarterly Summary Report Fourth Quarter 2009, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The site is an active 76-branded gasoline retail outlet located at the western corner of Holly Street and Industrial Road in San Carlos, California. BP acquired the property from Mobil Oil Corporation (Mobil) in 1989. In 1994, BP transferred the property to TOSCO Marketing Company (TOSCO) and has not operated the facility since that time. The site is located in a mixed commercial and residential area. There is an active Holly Gas and Diesel-branded station located southeast of the site. A Shell-branded station was previously located east of the site. The former City of San Carlos pumping station property and Bills Mini-Storage are located northeast of the site. Surface structures at the site consist of a station building located in the west-central portion of the site and two dispenser islands, which are covered by a canopy, in the east-central portion of the site. Two 10,000-gallon and one 12,000-gallon gasoline underground storage tanks (USTs) are located in a UST complex north of the dispenser islands. In response to a failed gasoline tank integrity test, the USTs located at the site were removed in March 1986. During the UST removal work, 17 inches of separate phase hydrocarbons (SPH) were observed on the groundwater surface in the excavation pit. Groundwater was encountered at approximately 3 to 4 feet below ground surface (bgs). Approximately 780 gallons of SPH were recovered from the tank pit and appropriately disposed offsite. The tank pit was dewatered to approximately 15 feet bgs to allow installation of new replacement USTs. More than 900 cubic yards of soil were excavated and disposed offsite at appropriate disposal facilities. Five exploratory borings (B-1 through B-4 and MW-1) were advanced to depths ranging between 11 to 30 feet bgs to assess the extent of contamination. Boring MW-1 was subsequently converted into a groundwater monitoring well. An additional soil sample (TankPit-2) was collected from the tank pit at 2 feet bgs and soil samples were also collected from MW-1 and B-3 at unreported depths. The analytical results of the soil sample from MW-1 reported 57 parts per million (ppm) total hydrocarbons and <1 ppm benzene. The analytical results of the soil sample from B-3 reported 50 parts per million (ppm) total hydrocarbons and <1 ppm benzene. In October 1986, five 2-inch diameter groundwater monitoring wells (MW-2 through MW-6) were installed onsite at total depths of 20 feet bgs and were screened between 7 and 20 feet bgs. Soil samples were not collected for analyses during the respective well installations. In August 1989, a shallow groundwater/soil gas investigation (SGI) was conducted to determine if petroleum hydrocarbons had migrated offsite and to assist in determining placement of offsite monitoring wells. The SGI revealed contaminant concentrations along the eastern edge of the site extending along Industrial Way. The highest concentrations were detected in the northeastern corner of the site. In February 1990,

two 4-inch diameter monitoring wells (MW-7 and MW-8) and one 6-inch diameter recovery well (RW-1) were installed. The wells were installed to total depths of approximately 20.5 to 21.5 feet bgs (MW-7 and MW-8) and approximately 26.5 feet bgs (RW-1). Based on a soil and groundwater investigation report by Exceltech, Inc. (Exceltech) dated August 1990, three groundwater monitoring wells (SC-1 through SC-3) were installed on the neighboring City of San Carlos property across from Industrial Way, as part of a separate environmental investigation. Upon permission from the City of San Carlos, the three monitoring wells SC-1 through SC-3 were incorporated into the investigation being conducted at the site. In May 1990, Exceltech performed an aquifer test at the site involving wells MW-1 through MW-5, RW-1, SC-1 and SC-2. A 4-hour step-drawdown pump test and a 54.5 hour constant discharge pump test were conducted on well RW-1. Drawdown in adjacent wells varied from 1.43 feet in MW-2 (17 feet southeast of RW-1) to 0.10 foot in MW-3 (60 feet southwest of RW-1). The hydraulic conductivity reported for wells MW-2 and RW-1 was 34.5 and 4.48 gallons per day per square foot, respectively. Exceltech estimated a pumping rate of 1.49 gallons per minute (gpm) could be sustained at the site. Approximately 6,000 gallons of groundwater generated during the pump test was appropriately disposed offsite. In February 1991, an interim groundwater extraction and carbon-based treatment system was installed onsite. The treatment system was permitted to discharge a maximum of 1,350 gallons per day of treated groundwater to the sanitary sewer. During operation between February 1991 and November 1992, the groundwater extraction and treatment system removed and treated a total of 245,000 gallons of groundwater and an estimated 300 gallons of SPH from the site. In November 1991, six exploratory soil borings (MB-1 through MB-6) were advanced onsite to the capillary fringe depth of 8.5 feet bgs. SPH was encountered at 2 to 6 feet bgs in MB-1 and at 4 to 5 feet bgs in boring MB-3. In January 1992, during the course of fuel line and dispenser island replacement work at the site, four soil samples (S-1 through S-4) were collected from shallow soils beneath the former dispenser locations, which coincide with the current dispenser locations. In November 1994, soil borings MW-9 and SP-1 were advanced onsite to depths of 21.5 feet bgs, and subsequently converted to a 2-inch groundwater monitoring well and a 2-inch air sparging point, respectively. On December 29, 1994, an air sparging (AS) test was conducted at the site using air sparge point SP-1 as the air injection point and wells MW-1 through MW-3 and RW-1 as the observation wells. Air sparging was performed for 135 minutes on SP-1, and yielded a maximum injection rate 4.5 standard cubic feet per minute (scfm) and maximum pressure of 15 pounds per square inch (psi). The AS test results indicated that an effective radius of influence of approximately 25 feet could be achieved at the site using an air injection rate of at least 5 standard cubic feet per minute (scfm) at 15 pounds per square inch (psi) at each point, with a recommended injection depth of approximately 18 to 20 feet bgs. In December 1995, one 550-gallon waste-oil UST, two hydraulic hoists and one oil-water separator (OWS) were removed from the site. No holes were noted in the removed UST; however, product sheen and odor were noted in the groundwater encountered at approximately 5 feet bgs in the UST excavation. Soil samples were collected at 5 feet bgs from the UST excavation, 4 feet bgs from the base of the OWS excavation, and at 5 feet bgs from the base of each hydraulic hoist excavation. hydrocarbons (TPRH) and total petroleum hydrocarbons as gasoline (TPHg) were reported at maximum concentrations of 21,000 and 3,300 milligrams per kilogram (mg/kg), respectively, in the hoist soil samples. Between February 4 and April 28, 2000, approximately 62,125 gallons of groundwater was extracted during 13 weekly events from a tank backfill well using a vacuum truck. In addition, approximately 875 gallons of groundwater was extracted from wells MW-1, MW-2, MW-3, MW-4, SP-1 and RW-1 using a vacuum truck. The vacuum truck filled to capacity, typically 5,000 gallons, in 30 to 45 minutes when extracting from the tank backfill well, equivalent to a maximum 170 gpm. The remaining wells dewatered during 10 to 45 minutes of pumping, yielding 50 to 200 gallons of water. No SPH were encountered during groundwater extraction from the tank backfill well. Residual SPH have been intermittently observed within monitoring wells MW-1 through MW-5 and RW-1, and were noted to correspond with low water levels, which cause SPH to preferentially drain to monitoring wells. The absence of observed SPH in the tank backfill well and intermittent observation of SPH in monitoring wells near the onsite UST complex was noted to be indicative of the limited volume of SPH remaining at the site. As of December 2001, remedial activities reportedly removed over 1,000 gallons of SPH from the site. Batch groundwater extraction was discontinued in June 2002 after a total of approximately 316,500 gallons of groundwater had been removed (Cambria). Overall, a total of approximately 561,500 gallons of groundwater has been removed from the site through the interim groundwater extraction system installed at the site in 1991 and the batch extraction program conducted at the site. In February 2001, two offsite monitoring wells (MW-10 and MW-11) were installed to depths of 20 feet bgs. In May 2002, four multi-level vapor probes (VP-1 through VP-4) were installed onsite to approximately 5 feet bgs. The probes were used to evaluate hydrocarbon inhalation exposures via indoor air. Probe VP-1 is located near the northern property boundary and probes VP-2 through VP-4 are located near the USTs and/or dispensers. The vapor probe clusters consist of three six-inch long screened intervals connected to the surface using 3/8-inch diameter plastic tubing. Each vapor probe cluster is screened from 1.5 to 2.0 feet bgs, from 3.0 to 3.5 feet bgs and from 4.5 to 5.0 feet bgs. Soil vapor samples were collected from vapor probes VP-1 through VP-4 in June 2002, August 2003, and April 2004. On January 18, 2007, Green Environment, Inc. (GEI) submitted a Well Decommissioning Report for wells owned by the City of San Carlos. The report stated that wells SC-2 through SC-4 were destroyed on November 22, 2006. Well SC-1 could not be located for destruction and has been missing since 1994. Several attempts were made to find the well between August and November of 2006, but were unsuccessful. In a letter dated June 16, 2006, GPP requested submittal of a Corrective Action Plan (CAP) to address petroleum hydrocarbons in soil and groundwater at the site. In response to the GPP request, SECOR submitted a Corrective Action Plan and Site Conceptual Model dated November 21, 2006. GPP reviewed the November 21, 2006 CAP/SCM and, in a letter dated November 29, 2007, directed submittal of a work plan for additional assessment to determine the targeted zone of contamination prior to approval of a CAP. Additionally, GPP required submittal of an updated SCM to identify potential data gaps with recommendations to address any identified data gaps. In accordance with GPP directives, SECOR submitted a 2005/2006 Annual Status Report, Updated Site Conceptual Model, and Work Plan for Additional Site Assessment dated February

15, 2008. In the letter dated November 20, 2008, the GPP requested an addendum to SECORs report that addressed the following topics: h Extent of Dissolved Phase Groundwater Contamination; h Hydrogeology and Subsurface Lithology; h Targeted Remediation Zones V Used Oil Tank and Hydraulic Hoist Area; and h Feasibility Studies V Groundwater Extraction and Soil Vapor Extraction. Stantec submitted Addendum to Work Plan for Additional Site Assessment, dated January 23, 2009. The addendum was approved by the GPP in a letter dated April 15, 2009. Per SWRCB Resolution 2009-0042, Stantec submitted a Proposed Groundwater Monitoring and Sampling Schedule to the GPP, dated July 28, 2009. The proposal recommended groundwater monitoring and sampling on a quarterly basis of newly installed wells MW-12 through MW-15 through the third quarter of 2010, and all previously existing wells on a semi-annual basis during the months of May and November. SPH recovery will continue on a monthly basis. Based on discussions with the GPP, this reduction to the monitoring and sampling schedule will be implemented during the fourth quarter.

Local Agency: SAN MATEO COUNTY LOP
File Location: Local Agency
Local Case Number: 770095
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel
Site History: The information below is from the 10/26/14 report prepared by Responsible Party's consultant. The San Mateo County Local Oversight Agency makes no representation as to the accuracy of the information. The Holly 76 gas station was previously operated as an ARCO/BP station. ARCADIS, consultant for ARCO/BP, is continuing an ongoing soil and groundwater investigation/monitoring of the site. On November 4, 2013, ARCADIS collected a sample of non-aqueous phase liquid (NAPL) from monitoring well MW-4. The laboratory reported the NAPL to be diesel fuel. The previous ARCO/BP station did not sell diesel fuel. Bay Petroleum, current owner of the station, began selling diesel fuel at the site in late 2010. On January 24, 2014 the station was notified by the San Mateo County, Groundwater Protection Program (GPP) that MW -4, located near dispenser 5/6, contained diesel fuel. The station voluntarily shut down the diesel fuel pumps at the site. On January 30, 2014, the system piping was tested and appeared to be functioning as designed, without leaks and was found to be in compliance by the San Mateo County representative. Based on this information, the San Mateo County GPP named Bay Petroleum as the responsible party to investigate the diesel fuel found in monitoring well MW -4. On March 4, 2014, Bay Petroleum met with Mr. Deno Milano of the County GPP to discuss the current site conditions. As a result of that meeting, GPP staff approved the removal of diesel fuel from the well and required periodic gauging of the well. Diesel fuel was to be measured and removed by Bay Petroleum during the months of April 2014, August 2014 and October 2014. ARCADIS was to gauge the fuel in the well during the months of June and December 2014. A report on the field activity is to be uploaded to the State GeoTracker database by December 31, 2014. During a site inspection, the GPP staff observed a crack in the concrete near the dispenser and monitoring well MW-4. According to GPP Staff, this crack could allow fuel from dispenser overfills to migrate to the soil and groundwater beneath the slab. Based on this the GPP requested a work plan to investigate the extent of diesel contamination in the soil and groundwater around monitoring well MW-4. On March 12, 2014, CCI met at the site with Mr. Vikram Singh of Bay Petroleum to evaluate the area around monitoring well MW-4. CCI observed some staining on the concrete around MW-4, which appeared to be petroleum related. There was a crack in the concrete a few feet southwest of the MW -4 well box. The crack appeared to be superficial and did not seem to extend all the way through the concrete. This was demonstrated by Mr. Singh who poured a little water on the crack. The water ponded but did not seep into crack. In addition, the flow of water on the concrete pad flowed toward monitoring well MW-4. This suggested that the diesel may have entered the well through the well box from an over-spill by a customer. On April 16, 2014, CCI went to the site to measure the amount of diesel fuel and remove the product from the well. Mr. Dino Milano from County GPP was present during the measuring of the well. Groundwater was measured at 4.20 feet below the top of the well casing. Total depth of the well was measured at 16.71 feet. Using an interphase probe, no free phase product was measured in the well. A stainless steel bailer was used to bring a sample of water to the surface and was placed in a clean 5-gallon bucket to observe for

product sheen. No sheen was noted on the water surface. CCI returned to the site on August 13, 2014 to check monitoring well MW-4 for free phase product a second time. Groundwater was measured at 4.75 feet below the top of the well casing. No free phase product was measured in the well.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For

Violation Notes: USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months. Returned to compliance on 10/17/2019. Overfill testing has yet to be completed at this site for any of the tanks. All buckets are contained within sumps. Schedule Overfill testing within 30 days and notify SMCUPA at least 48 hours prior to testing. Overfill test was supposed to have been completed by October 13, 2018, and facility is now over 9 months overdue for this requirement. DO reports have been documenting that overfill testing has not been completed.

Violation Date: 07-24-2019
Citation: 23 CCR 16 2712(b)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(2)
Violation Description: Failure to maintain monitoring records for release detection and/or maintain records of appropriate follow-up actions.
Violation Notes: Returned to compliance on 07/24/2019. DO reports are currently not being signed by the owner/operator. There have been no action items noted, however, DO reports still must be signed by the owner/operator each month. Begin signing the DO reports to acknowledge any corrective action that may be needed as noted by the DO. This was done on site. Ensure reports continue to be signed going forward.

Violation Notes: to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months. Returned to compliance on 10/17/2019. Overfill testing has yet to be completed at this site for any of the tanks. All buckets are contained within sumps. Schedule Overfill testing within 30 days and notify SMCUPA at least 48 hours prior to testing. Overfill test was supposed to have been completed by October 13, 2018, and facility is now over 9 months overdue for this requirement. DO reports have been documenting that overfill testing has not been completed.

Name: FORMER BARON-BLAKESLEE (PUREX)
Address: 511 O'NEILL AVE
City,State,Zip: BELMONT, CA 94002
Region: STATE
Facility Status: Open - Remediation
Status Date: 06/14/2004
Global Id: SL18385805
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.5202553772525
Longitude: -122.271539338623
Case Type: Cleanup Program Site
Case Worker: KAW
Local Agency: SAN MATEO COUNTY LOP
RB Case Number: 41S0084
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Trichloroethylene (TCE)
Site History: A small solvent distribution/ recycling plant operated at the 0.2 acre Site from 1961 to 1974, and a battery distribution/recycling facility operated there between 1978 and 2004. In accordance with Site Cleanup Requirement (SCR) Orders Nos. 98-018, 99-015, and R2-2004-0015 issued by the Regional Water Board, several investigations have been performed to assess the extent of soil and groundwater contaminated by volatile organic compounds (VOCs) at and around the Site. Subsequent remediation activities to meet the

1001815535

cleanup goals for soil and groundwater have included 1) excavating contaminated soil 2); in-situ chemical oxidation (ISCO) to destroy VOCs in soil; and 3) enhanced in-situ bioremediation (EISB) to remove VOCs from groundwater. Over time, TCE and cis-1,2-DCE plumes have migrated in a northeast-east direction from the Site toward the Redwood Creek and Redwood Shores Lagoon. Belmont Creek is located approximately 1/4 mile SE (downgradient) of the Site. Occasional offsite access issues may impede downgradient remedial activities. Some offsite properties have risk management requirements for certain construction or excavation activities, primarily for protection of human health, until Site cleanup is complete. These parcels are flagged in the City of Belmont and/or San Mateo County Building Dept. databases, and certain building permits will be held until need for risk management has been determined and addressed. (See "BBI-Purex 2005 Institutional Controls Plan" on the site documents page for specific information.)

WDS:

Name: BFI WASTE SYSTEMS RECYCLERY
Address: 333 Shoreway Rd
City: SAN CARLOS
Facility ID: San Francisco Bay 411000899
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 6505922825
Facility Contact: BAZZANI STEVE

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Correspondence
Completed Date: 02/06/2012
Comments: completed by Michelle Dalrymple GSU

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Agreement
Completed Date: 09/12/2013
Comments: Signatories to the CORI agreement include Evergreen Oil, Inc. (owner and operator of CORI), Garratt-Callahan Company (owner of property) and DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 07/14/2000
Comments: The investigation report was approved, and an asphalt cap was installed as part of Closure for the Site in 2005. The Site is currently in post-closure groundwater monitoring to ensure that the cap is effective.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 11/21/2013
Comments: The Report includes current and historic groundwater elevation and analytical test results, groundwater sampling methods, time-series graphs for chemicals of concern (COCs), and concentration maps of selected COCs. COCs at the site are volatile organic compounds (VOCs), which are primarily chlorinated ethenes, 1,4-dioxane, and total petroleum hydrocarbons (TPH) in the diesel range.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/12/2014
Comments: Semi-Annual Groundwater Monitoring Report for both CORI and GC Lubricants. Groundwater monitoring shows groundwater plume primarily in the shallow zone and consistency from previous Semi-Annual Report in contaminants (VOCs) and concentrations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: RFI Workplan Addendum
Completed Date: 08/11/2014
Comments: This workplan is for grab groundwater samples and based on Membrane Interface Probe (MIP) data collected as the first phase of field work. The groundwater investigation for the GC lubricant and California Oil Recyclers (CORI) is using a Triade approach and the report and workplan is based on MIP data. Grab groundwater sample collection is the second phase and a monitoring wells is planned for a later phase.

Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/11/2013
Comments: 2011 Second Semi-Annual Groundwater Monitoring Report

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/11/2013
Comments: 2012 First Semi-Annual Groundwater Monitoring Report. COCs at the site are volatile organic compounds (VOCs), which are primarily chlorinated ethenes, 1,4-dioxane, and total petroleum hydrocarbons (TPH) in the diesel range. The chlorinated ethenes include tetrachloroethene (PCE), trichloroethene (TCE), dichloroethenes (DCE) and vinyl chloride (VC). The chlorinated ethenes in groundwater occur in two main plumes that merge downgradient. The comingled plumes have traveled approximately 900 hundred feet downgradient in a northeasterly direction. Most wells show a consistent concentration trend (i.e., variable within a range for all sampling results). Some of the wells show either an increasing trend or decreasing trend chlorinated ethenes.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/21/2013
Comments: The report includes current and historic groundwater elevation and analytical test results, groundwater sampling methods, time-series graphs for chemicals of concern (COCs), and concentration maps of selected COCs. COCs at the site are volatile organic compounds (VOCs), which are primarily chlorinated ethenes, 1,4-dioxane, and total petroleum hydrocarbons (TPH) in the diesel range.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 04/25/2018
Comments: The completed interim measures include the excavation of contaminated soil at 941 Bransten Road (the adjacent property, adjacent to and downgradient of the GC Lubricants Lubricants building located at 977 Bransten Road). GC Lubricant s contractor removed and disposed of off-site approximately 1,250 tons of chlorinated volatile organic compounds contaminated soil. To enhance reductive dechlorination in groundwater, GC-Lubricant contractors applied 800 pounds of 3-D Microemulsion to the base and sidewalls of the of the open excavation.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Contaminants of Concern:	* Solvents
Potential Media Affected:	Under Investigation
Site History:	Harris Microwave Semiconductor , Inc. operated at the site until May 1984. Sump removal (neutralization tank) from the facility in 1986; TCE was detected in soil samples up to 6mg/kg, pH 9.6. Additional site investigation conducted by Emcon in 1987 to determine the GW quality downgradient of the facility. Emcon concluded that the Appert facility is not the source of the VOCs detected in the offsite well E-2 (TCE up to 2.2 mg/l, PCE 0.092 mg/L).

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
OSHA ESTABLISHMENT
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Registry ID: 110070096756

Click Here:

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020	Source: EPA

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 05/03/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020
Date Data Arrived at EDR: 10/20/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Southwest Map: 5640628 WOODSIDE, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

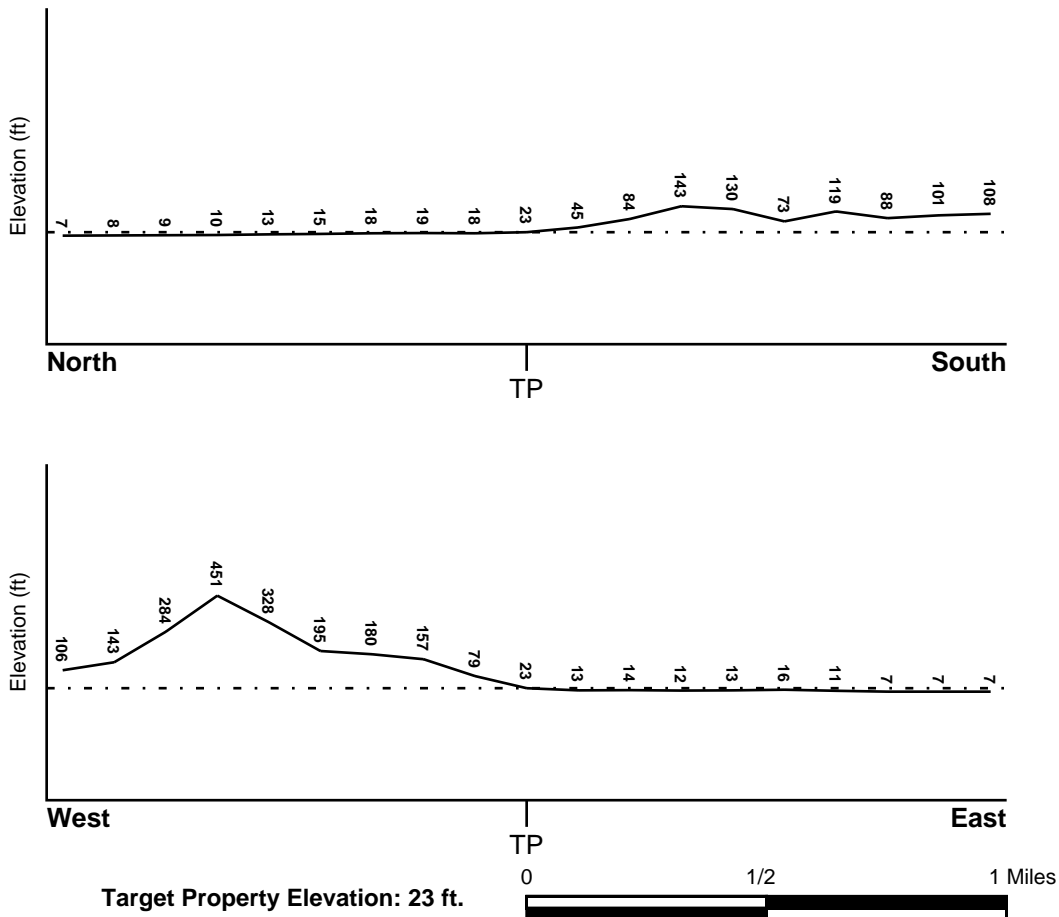

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06081C0169F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

06081C0282E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SAN MATEO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ARCADIS U.S., Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ARCADIS U.S., Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Subject:

Limited Phase II Environmental Site Investigation Memorandum
11 El Camino Real, San Carlos, California

ENVIRONMENT

Dear Mr. Norris:

Arcadis U.S., Inc. (Arcadis) has prepared this Limited Phase II Environmental Site Investigation Memorandum (Memorandum) concerning the 11 El Camino Real, California property (the Site; Figure 1) for SummerHill Apartment Communities (SummerHill). The purpose of the Limited Phase II Environmental Site Investigation was to obtain analytical data for various media that SummerHill requested as part of their due diligence activities.

Date:
June 1, 2021

Summary of Site Background

Based on a review of aerial photos, in 1943 the northern portion of the Site was developed with four rectangular structures and the southern portion of the Site included a portion of a larger building. By 1950, the northern portion of the Site was developed with one larger one-story building and two adjoining smaller one-story buildings, and the southern portion of the Site remained developed with a portion of a large commercial building. The building along the southern portion of the Site appeared vacant as of 1950. The buildings in the northern and southern portions of the Site had been demolished by 1970 and 1974, respectively. The Site remained vacant until sometime prior to 1982, when the current Site building was constructed in the northern portion of the Site and the southern portion of the Site was developed with the current asphalt-paved parking lot. No significant changes were evident through the present. The Site use was reportedly sign manufacturing and steel plating operations starting in 1950. By 1968, the buildings in the northern portion of the Site were used for carpet and boat storage, and the building along the southern portion of the Site was operated as a cabinet shop. The current Site building was operated as a Longs Drug Store between 1986 and 2009 and by CVS from 2010 through the present.

Mr. Richard Norris

June 1, 2021

Scope of Work

Three soil boring locations were advanced throughout the Site (Figure 2) for the collection of soil, groundwater, and soil-vapor samples. The soil sample data will be used to evaluate if the soil can be reused or if disposal at an offsite facility is necessary based on Department of Toxic Substances Control (DTSC) import fill guidance. The soil-vapor sample data will be used to assess the presence of volatile organic compounds (VOCs) in soil vapor and to evaluate the need for vapor mitigation in the future development design. The groundwater sample will be used to evaluate the presence of VOCs in groundwater from potential off-site and/or on-site sources.

Pre-Field Activities

Site-Specific Health and Safety Plan

As required by the Occupational Safety and Health Administration (OSHA) Standard “Hazardous Waste Operations and Emergency Response” guidelines (29 Code of Federal Regulations Section 1910.120), and by California Occupational Health and Safety Administration (Cal-OSHA) “Hazardous Waste Operations and Emergency Response” guidelines (California Code of Regulations Title 8, Section 5192), Arcadis prepared a site-specific health and safety plan (HASP) prior to commencing fieldwork. All field staff and contractors reviewed the HASP before beginning field operations at the Site.

Permitting

A subsurface drilling permit for the advancement of three soil borings was obtained from the San Mateo County Department of Environmental Health (SMCDEH). A copy of the SMCDEH boring permit is included as Attachment 1.

Underground Utility Locating

On April 30, 2021, Arcadis subcontracted a private utility locator, Ground Penetrating Radar Systems, Inc. (GPRS), prior to conducting subsurface work at the Site. Each proposed boring location was cleared of underground utilities by ground penetrating radar. In addition, Underground Service Alert (USA) was notified a minimum of 48 hours prior to commencing intrusive field activities to identify any public utility alignments that may conflict with the proposed borings.

Mr. Richard Norris

June 1, 2021

Field Activities

Soil Boring Advancement and Sampling

On April 30, 2021, Arcadis oversaw Cascade Drilling, LLC. (Cascade) as they advanced three soil borings (SB-1 through SB-3) using a hand auger at the locations shown on Figure 2. Boring SB-1 was advanced to approximately 11 feet below ground surface (bgs), and SB-2 and SB-3 were advanced to 10 feet bgs. Three soil samples were collected from each boring at approximately two, six, and 10 feet bgs.

Soil cores collected from all borings were classified using visual and manual methods, and described in accordance with the Unified Soil Classification System. In addition, relative VOC concentrations were measured with a photoionization detector (PID) from soil head space. The soil screening procedures included measuring approximately 30 grams from a relatively undisturbed soil sample and placing this sample in a sealed container (zip-lock bag). After approximately 20 minutes, the head space within the bag was tested for total VOC concentrations, measured in parts per million. The PID results are noted on the field boring logs along with observations of staining, odors, and other soil characteristics, where applicable. Boring logs are included in Attachment 2.

All soil samples were collected in laboratory-supplied containers and submitted to Enthalpy Analytical (Enthalpy), a California Department of Health Services-certified laboratory under appropriate chain-of-custody protocols and were analyzed using the following analytical methods:

- California Assessment Manual (CAM) 17 metals using United States Environmental Protection Agency (USEPA) Method 6010B/7471A;
- VOCs using USEPA Method 8260B
- Semi-volatile organic compounds (SVOCs) using USEPA Method 8270C (with Selective Ion Monitoring [SIM]); and
- Total petroleum hydrocarbon (TPH) as gasoline, TPH as diesel (TPHd), and TPH as motor oil (TPHmo) using USEPA Method 8015M with silica gel cleanup.

Shallow samples collected from all borings at approximately two feet bgs were additionally analyzed using the following analytical methods:

- Organochlorine pesticides (OCPs) using USEPA Method 8081A;
- Polychlorinated biphenyls (PCBs) using USEPA Method 8082; and
- Asbestos by USEPA Method Polarized Light Microscopy (PLM) 600/R-93/116.

Mr. Richard Norris

June 1, 2021

Soil analytical results are presented in Table 1.

Soil-Vapor Probe Installation

Cascade converted boring SB-1 into a soil-vapor probe (SVP) at the location SVP-1, shown on Figure 2. The SVP was constructed with a 6-inch long stainless-steel screen within a 1-foot interval of sand pack from approximately five to six feet bgs allowing approximately three inches of sand above and below the screen. The sand pack was covered with a 1-foot interval of dry granular bentonite. The remainder of the borehole was filled with hydrated granular bentonite with a 0.5-foot cement cap at the top of the borehole. The SVP assembly consisted of a stainless-steel permeable probe tip, a length of ¼-inch outside-diameter Teflon tubing and a vapor-tight cap (such as Swagelok® cap) to prevent infiltration of water or ambient air into the subsurface. A 6-inch traffic-rated well box was installed at surface grade to protect the SVP for resampling (if required).

Temporary Well Installation and Grab-Groundwater Sampling

During the advancement of borings SB-1 and SB-3 to depths of 11 feet and 10 feet respectively, groundwater was not encountered. On May 3, 2021, in an attempt to collect a groundwater sample, boring location SB-2 was advanced using a direct push technology (DPT) drill rig until encountering refusal at approximately 30 feet bgs. Groundwater was not encountered in SB-2. Due to the lack of groundwater encountered, grab groundwater samples could not be collected from the advanced borings.

Soil-Vapor Probe Sampling

After allowing the newly installed SVP-1 to equilibrate for a minimum of 48 hours, SVP-1 was sampled by Arcadis on May 3, 2021. Prior to collecting soil-vapor samples, the SVP was connected to a laboratory-supplied sample manifold and shut-in and quantitative leak tests were conducted, in accordance with California Environmental Protection Agency (CalEPA) guidance¹. The shut-in test involved assembling the aboveground valves, lines, and fittings downstream from the top of the SVP location and evacuating the sample manifold to a minimum measured vacuum of approximately 100 inches of water using a purge pump. The test was conducted while the sampling canister was attached with its valve in the closed

¹ California Environmental Protection Agency. 2015. Advisory – Active Soil Gas Investigations. July.

Mr. Richard Norris

June 1, 2021

position. The vacuum gauge was connected to the system with a tee fitting for at least one minute, and field staff observed and recorded the reading. If there was any observable loss of vacuum, the fittings were adjusted until the vacuum in the sample train did not noticeably dissipate. After the shut-in test was validated, the sampling train was not altered.

A leak test was performed to evaluate the integrity of the SVP and sample train and to confirm that ambient air was not introduced into the soil-vapor sample during the collection process. To ensure no leakage during sampling, the entire sampling train was placed under a sampling shroud. High purity grade helium was used as a tracer compound for each leak test. The tracer compound was permitted into the shroud and monitored for concentration stability using a handheld helium detector. Samples were not collected from the sample port until the leak test confirmed that leaks resulting in detections of helium above the accepted 5 percent allowable maximum were not present. Helium concentrations were recorded at the time of sample collection on the field sampling sheets included in Attachment 3. In addition, soil-vapor samples were analyzed for helium by American Society for Testing and Materials Method (ASTM D-1946) to further confirm the integrity of the sampling system.

Three purge volumes of stagnant and ambient air were removed from the sampling system via a purge pump so that samples collected would be representative of subsurface conditions. Each purge volume was determined based on the SVP construction (approximately 2,500 milliliters for the SVP screened at approximately 5.5 feet bgs). Sample collection information is provided on the field sampling data sheets (Attachment 3).

Following the shut-in test and leak check, stagnant air was purged from the SVP and transferred to a Tedlar[®] bag via plastic syringe or personal air sampling pump. Samples were collected in 1-liter Summa canisters, stopping sample collection once canisters reached 5 inches mercury (Hg), and analyzed by Eurofins AirToxics, a state-certified laboratory, for VOCs (USEPA Method TO-15).

In addition to pre-sampling QA/QC measures, one duplicate sample was collected. The duplicate sample was collected with both the parent and duplicate canisters connected in-line with an additional tee fitting.

Decontamination

All down-hole sampling equipment was triple-rinsed prior to deployment and following the completion of work at each boring location. Decontamination of non-

Mr. Richard Norris

June 1, 2021

dedicated or non-disposable field sampling equipment was conducted using an Alconox® solution and water rinse to prevent potential cross-contamination.

Investigation Derived Waste Management

Investigation derived waste (IDW), including soil cuttings and decontamination water was containerized in Department of Transportation-approved 55-gallon steel drums. The IDW is temporarily being stored at the Site in a location approved by the current owner, pending characterization. Once characterized the IDW will be disposed of at a state-licensed disposal facility.

Analytical Results

Soil Analytical Results

Soil analytical results for samples collected from borings SB-1 through SB-3 were compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening Levels (ESLs)². Additionally, arsenic results were compared to the established background range of arsenic in the San Francisco Bay Area (11 milligrams per kilogram [mg/kg])³. Soil analytical results for detections of TPH, VOCs, SVOCs, OCPs, and CAM 17 metals are included in Table 1. Laboratory analytical reports and chain-of-custody documentation are included in Attachment 4. Described below are constituents present in soil samples above their respective ESLs.

- Chlordane was detected above the ESL of 0.0085 mg/kg in the sample collected from SB-2 at 2 feet bgs at a concentration of 0.39 mg/kg.
- Aroclor-1260 was detected above the ESL of 0.23 mg/kg in the sample collected from SB-3 at 2 feet bgs at a concentration of 0.52 mg/kg.
- Cadmium was detected above the ESL of 1.9 mg/kg in the sample collected from SB-1 at 6 feet bgs at a concentration of 4.0 mg/kg.
- Cobalt was detected above the ESL of 23 mg/kg in the sample collected from SB-1 at 6 feet bgs at a concentration of 26 mg/kg.

² San Francisco Bay Regional Water Quality Control Board, 2019. Environmental Screening Levels. January (Revision 2).

³ Duverge. 2011. Establishing Background Arsenic in Soil of the Urbanized San Francisco Bay Region. December.

Mr. Richard Norris

June 1, 2021

- Lead was detected above the ESL of 32 mg/kg in the sample collected from SB-2 at 6 feet bgs at a concentration of 44 mg/kg. The Toxicity Characteristic Leaching Procedure (TCLP) concentration for this sample was <0.015 milligrams per liter (mg/L).
- Nickel was detected above the ESL of 86 mg/kg in samples collected from SB-1 at 6 feet bgs and SB-2 at 10 feet bgs at concentrations of 380 mg/kg and 87 mg/kg, respectively. SB-1 at 6 feet bgs TCLP and Soluble Threshold Limit Concentration (STLC) concentrations were 0.14 and 0.76 mg/L, respectively. SB-2 at 10 feet bgs TCLP result was <0.060 mg/L.
- Vanadium was detected above the ESL of 18 mg/kg in all samples collected at concentrations ranging from 29 mg/kg (SB-3 at 10 feet bgs) to 92 mg/kg (SB-1 at 6 feet bgs).

There were no additional ESL or background exceedances in collected soil samples.

Soil-Vapor Analytical Results

On May 3, 2021, one soil-vapor sample and one duplicate sample was collected at SVP-1 for analysis of VOCs using USEPA Method TO-15 and helium by ASTM D-1946. Soil-vapor analytical results for detected analytes and the results of the helium analysis are included in Table 2. The soil-vapor analytical results were compared to SFRWQCB residential subslab/soil gas Tier 1 ESLs. The data are presented in Table 2 and described below:

- Methylene Chloride was detected above the ESL (34 micrograms per cubic meter [$\mu\text{g}/\text{m}^3$]) in the samples at concentrations of 760 $\mu\text{g}/\text{m}^3$ (SVP-1) and 740 $\mu\text{g}/\text{m}^3$ (DUP-1).
- Benzene was detected above its ESL (3.2 $\mu\text{g}/\text{m}^3$) in the samples at concentrations of 5.7 $\mu\text{g}/\text{m}^3$ (SVP-1) and 5.5 $\mu\text{g}/\text{m}^3$ (DUP-1).
- 1,2-Dichloroethane (1,2-DCA) was detected above its ESL (3.6 $\mu\text{g}/\text{m}^3$) in the samples at concentrations of 13 $\mu\text{g}/\text{m}^3$ (SVP-1) and 14 $\mu\text{g}/\text{m}^3$ (DUP-1).
- Tetrachloroethene (PCE) was detected above its ESL (15 $\mu\text{g}/\text{m}^3$) in the samples at a concentration of 33 $\mu\text{g}/\text{m}^3$ in both samples SVP-1 and DUP-1.

Additional VOCs detected above their respective laboratory reporting limits included ethanol, toluene, xylenes, acetone, cyclohexane, hexane, heptane, carbon disulfide, methyl ethyl ketone (MEK), cis-1,2-dichloroethene, tetrahydrofuran, 2,2,4-trimethylpentane, trichloroethene, 4-methyl-2-pentanone, ethylbenzene, styrene, 4-ethyltoluene, 1,3,5-trimethylbenzene, and 1,2,4-trimethylbenzene. However, all of these additional VOCs were all below their respective ESLs (Table 2). Laboratory analytical reports and chain-of-custody documentation are included in Attachment 4.

Mr. Richard Norris
June 1, 2021

Soil-Vapor Sample QA/QC Evaluation

QA/QC procedures included field analyzing the soil-vapor sample for helium and collecting a duplicate sample at location SVP-1. There were no detections of VOCs above the laboratory reporting limits indicating the laboratory-supplied equipment (i.e., manifolds, summa canisters, tubing) was relatively free of contaminants.

To ensure no leakage during soil-vapor sampling, the entire sampling train was placed under a sampling shroud. Laboratory-grade helium was used as a tracer compound for each leak test. The tracer compound was permitted into the shroud and monitored for concentration stability using a helium detector. To verify that there was no leakage, each soil-vapor sample purge volume was field analyzed for helium. Helium was not detected in the soil-vapor samples collected indicating no ambient air leakage occurred during those sampling events.

Field duplicate sample (DUP-1) was collected from SVP-1. The relative percent difference (RPD) was within acceptable limits (50%) for all detected constituents except 4-Methyl-2-pentanone. 4-Methyl-2-pentanone was detected in the primary sample but was not detected above the laboratory reporting limit in the duplicate sample.

Conclusions

Soil samples collected from the three borings had detectable concentrations of TPHd and TPHmo. However, none of the samples contained these petroleum hydrocarbons at concentrations above their respective ESLs. In addition, chlordane, Aroclor-1260, and several metals were present in soil samples above their respective ESLs.

The analytical results for soil samples collected at the Site indicate that the soil likely would be characterized as non-hazardous and would possibly be acceptable to a potential receiver site. Final designation should be determined by the transport and disposal contractor in consultation with the selected disposal site.

Benzene and 1,2-DCA were detected in the soil-vapor sample. Benzene is a chemical found in petroleum hydrocarbons and 1,2-DCA historically was used as an additive for gasoline and likely is a petroleum hydrocarbon-related compound. The presence of petroleum hydrocarbon-related compounds in the soil-vapor sample may be attributed to either the Unocal Gas Station (#2913) or the Auto Pride Car Wash, both located approximately 400 feet southeast of the Site. Soil, groundwater, and soil-vapor investigations and remediation activities had been conducted at both the Unocal Gas Station and the Auto Pride Car Wash under the oversight of San Mateo

Mr. Richard Norris

June 1, 2021

County Environmental Health (SMCEH). The SMCEH issued a no further action letter for the Unocal Gas Station on February 4, 2014 and for the Auto Pride Car Wash on October 19, 2017.

PCE and methylene chloride were detected above their respective ESL in the soil-vapor sample. The presence of PCE in soil vapor may be attributed to San Carlos Dry Cleaners which is located approximately 250 feet southeast from the Site. Methylene chloride is a compound that historically has been used in various industrial processes, in many different industries including paint stripping, pharmaceutical manufacturing, paint remover manufacturing, and metal cleaning and degreasing. Chemicals including methylene chloride may have been used during historical site activities which included sign manufacturing, steel plating operations, and cabinet manufacturing.

Based on the presence of PCE and methylene chloride in soil vapor above their ESLs, a vapor barrier is recommended beneath future ground level areas that include potential conduits (stairwells, elevator shafts, trash chutes) to the residential units above. The installation of a vapor barrier beneath potential conduits during future site development should be adequate to protect future inhabitants of the property.

Any future development at the Site should also include the preparation and utilization of a site-specific soil and groundwater management plan (SMP) to manage potentially impacted soil, soil vapor, and groundwater. The soil sampling analytical results indicate that soil removed during future development activities will likely be characterized as non-hazardous soil and require disposal at an appropriate disposal facility. The SMP will include a description of work protocols and potential chemical analyses that will be needed to accommodate future development of the Site, if any.

If you have any questions or comments regarding the contents of this Memorandum, please contact Justin Sobieraj at 415.858.8310 or by e-mail at Justin.Sobieraj@arcadis.com or Chuck Pardini at 415.915.8063 or by email at Chuck.Pardini@arcadis.com.

Sincerely,

Arcadis U.S., Inc.

Justin Sobieraj, PG (8524)

SUBSURFACE DRILLING PERMIT APPLICATION CHECKLIST

CHECKLIST

- Legibly filled in all appropriate blanks and boxes, except signature and date (review instructions to verify appropriate fields to leave any lines blank or unchecked).
- Have all required signatures (can be on separate pages, do not need to be wet signatures).
- Include appropriate fee with application. Payment can be made by credit card over phone to (650) 372-6200 (indicate when and how application submitted).
- Include scaled site map of site in relation to cross streets and drilling location in relation to site features.
- Show approximate location(s) and ID/Name of well/borings.
- For well installations, indicate (i.e. mark on permit application) anticipated destruction method of these wells. May be asked to provide written description for small diameter (<2") wells.
- For well destructions via pressure grouting, included well construction logs and grout volume calculations. An approved work plan is required for all well destructions.
- Shallow (<10') vapor wells do not need to be permitted. However, still must comply with well standards for installation and destruction (i.e. do not use bentonite alone in vadose zone for sanitary seal and remove all non-native material).
- Notify permitting inspector 2 full working days prior to start of drilling.
Separate notification to case worker if known contaminated site.
- Consultant must submit all required information within 60 days of drilling (preferably to drilling@smcgo.org).
- For Borings and wells: require logs, site map, and analytical data.
- For wells: require surveyed coordinates and elevation, Well Completion Report (or indicate upload to Department of Water Resources Online System of Well Completion Reports DWR's OSWCR).

COMMON MISTAKES TO AVOID ON APPLICATION

Listed **potential buyer** as Property Owner,

Listed case's address rather than drilling location's address.

Failed to include Assessor's Parcel Number of the drilling location.

- Provided variance justification memo if temporary wells/borings may need to be left open for more than 24 hours to wait for groundwater recharge with estimate of maximum time needed.

- Permit is for **one mobilization** only. If work included in this permit cannot be done in a single mobilization, another permit may be required.

- Well owner must submit indication of annual use of wells (monitoring reports in association with corrective action requests satisfies this requirement); otherwise, wells need to be destroyed within year of last originally intended use.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

SUBSURFACE DRILLING PERMIT APPLICATION CHECKLIST

CHECKLIST

- Legibly filled in all appropriate blanks and boxes, except signature and date (review instructions to verify appropriate fields to leave any lines blank or unchecked).
- Have all required signatures (can be on separate pages, do not need to be wet signatures).
- Include appropriate fee with application. Payment can be made by credit card over phone to (650) 372-6200 (indicate when and how application submitted).
- Include scaled site map of site in relation to cross streets and drilling location in relation to site features.
- Show approximate location(s) and ID/Name of well/borings.
- For well installations, indicate (i.e. mark on permit application) anticipated destruction method of these wells. May be asked to provide written description for small diameter (<2") wells.
- For well destructions via pressure grouting, included well construction logs and grout volume calculations. An approved work plan is required for all well destructions.
- Shallow (<10') vapor wells do not need to be permitted. However, still must comply with well standards for installation and destruction (i.e. do not use bentonite alone in vadose zone for sanitary seal and remove all non-native material).
- Notify permitting inspector 2 full working days prior to start of drilling. **Separate notification to case worker if known contaminated site.**
- Consultant must submit all required information within 60 days of drilling (preferably to drilling@smcgov.org).
- For Borings and wells: require logs, site map, and analytical data.
- For wells: require surveyed coordinates and elevation, Well Completion Report (or indicate upload to Department of Water Resources Online System of Well Completion Reports DWR's OSWCR).

COMMON MISTAKES TO AVOID ON APPLICATION

Listed **potential** buyer as Property Owner,

Listed case's address rather than drilling location's address.

Failed to include Assessor's Parcel Number of the drilling location.

- Provided variance justification memo if temporary wells/borings may need to be left open for more than 24 hours to wait for groundwater recharge with estimate of maximum time needed.

- Permit is for **one mobilization** only. If work included in this permit cannot be done in a single mobilization, another permit may be required.

- Well owner must submit indication of annual use of wells (monitoring reports in association with corrective action requests satisfies this requirement); otherwise, wells need to be destroyed within year of last originally intended use.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

SUBSURFACE DRILLING PERMIT APPLICATION

REQUIREMENTS

An accurate and correct map **must** be submitted with the application and include the following: north arrow, existing and historic site features, existing and proposed well/boring locations with ID's to scale, property lines and any other pertinent information. A work plan describing the drilling and construction/destruction methodology must be submitted to County staff. A complete application with appropriate fees must be submitted 3 working days in advance of drilling and notification of start date and time must be provided at least 2 working days prior to drilling. The permit is subject to both General and Special Conditions stated below. A copy of the approved Subsurface Drilling Permit **must** be available on site while work related to the permit is being performed. **Drilling may begin at the notified date and time whether County staff is present or not.**

GENERAL CONDITIONS

- A. **Field notification must be provided to GPP drilling inspection staff at least 2 full working days prior to the start of drilling. GPP Caseworker also must be notified if site is associated with a remedial action case.**
- B. Well and boring construction and destruction under this permit are subject to the Standards for the Construction of Wells in San Mateo County, County Groundwater Protection Program (GPP) Guidelines, Policies & Procedures, the State Water Well Standards, and any instructions by EHS representative.
- C. Well/Boring Owner, Driller, and Responsible Professional assume responsibility for all activities and uses under the permit, including compliance with Workmen's Compensation Laws, and indemnify, defend and save the County of San Mateo, its officers, agents and employees, free and harmless from any and all expense, cost, or liability in connection with or resulting from work or stopped-work associated with the permit, including, but not limited to, property damage, personal injury, wrongful death, and loss of income.
- D. All borings **must** be properly destroyed (grouted/sealed) within 24 hours of drilling, unless special conditions are approved beforehand in writing as part of this permit, and must be continuously protected and stabilized.
- E. Analytical results of all soil, vapor, and groundwater samples collected during the execution of drilling under this permit **must** be submitted to County GPP staff by the Responsible Professional within 60 days of sample collection. If contamination is discovered during drilling, verbal notification to County GPP by the Responsible Professional is **required** within 72 hours of discovery. Proper storage, labeling & disposal of investigation-derived residual wastes are the responsibility of the consultant unless stated otherwise contractually.
- F. Boring logs, well construction details, and finalized as-built location map for all borings/ wells (except geotechnical borings) signed by a Responsible Professional, **must** be submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction. DWR Form 188 must be filed with the State per water code 13752.
- G. Permit is valid only for the purpose specified herein. No change in purpose or required procedures, as described on this permit application, in the associated workplan, or in the special conditions below, will be allowed except upon written permission from the County. Construction aspects can be changed based on conditions encountered in the field.
- H. **Permit is valid for one mobilization** associated with originally permitted boring/well locations only, including contingency locations, and is automatically canceled if not exercised, or if an extension is not applied for and granted within 120 days of the original permit issuance date. Failure to notify staff of cancellation or delay in start time will result in the Consultant being billed an inspection cancellation fee if GPP staff attempted to perform an inspection. Fees are listed at smchealth.org/ehfees.
- I. Wells installed under this permit may not be used for domestic, municipal, agricultural, or irrigation water supply.
- J. All work performed **must** conform to Business and Profession Codes and State Water Well Standards.
- K. Top-of-casing elevation of all wells **must** be surveyed to the nearest 0.01-foot relative to Mean Sea Level or NAVD88 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate. Geotechnical wells are exempt from this requirement if a written variance from GPP is obtained prior to drilling.
- L. Latitude and longitude of all wells **must** be surveyed with sub-meter accuracy relative to NAD83 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate.
- M. Violation of any requirement or general or special permit condition may result in an order by GPP staff to cease work under this permit, correct the violation, potentially re-permit the work as a new mobilization, and potential actions may be taken against the Well Owner, Property Owner, or Responsible Professional by GPP.

PERMIT APPLICATION INSTRUCTIONS AND FEES

A subsurface drilling permit for borings and wells is required if groundwater is anticipated to be encountered or if drilling extends to 10 feet or deeper. Sub-slab and vapor wells shallower than 10 feet do not require a permit. Should groundwater be encountered shallower than 10 feet unexpectedly, then contact San Mateo County EHS Groundwater Protection Program (GPP) immediately and a permit application will be required retroactively. GPP is the permitting agency for all subsurface drilling for environmental and geotechnical purposes within San Mateo County. San Mateo County EHS Land Use Program (LUP) reviews all water well permit applications (smchealth.org/environ/forms) for public supply, domestic, agricultural, cathodic protection, exploratory, and geothermal heat exchange well construction and destruction and permit applications for all reconnaissance, investigation, and excavation work strictly for land use purposes. Please contact the LUP at (650) 372-6200 to discuss permitting, notification, and drilling requirements.

A 120-day extension may be granted for permits which have not been used during the original 120-day time frame. Submit another Subsurface Drilling Permit Application and payment for the permit extension fee at 50% of the fee for the type of drilling. Extension must be requested prior to the original permit expiring. If there are several wells and borings over several contiguous assessor's parcels and public right-of-ways, then discuss the fee with the County inspector at (650) 464-0047 or drilling@smcgov.org. The County inspector may charge only one fee for borings and wells constructed across contiguous assessor's parcels and public right-of-ways. However, this is dependent on how much the County inspector believes will need to be inspected in the field and how much review time of required submittals will be needed.

Section 1: Purpose of Application

At least one of the four boxes must be selected; however, multiple boxes may be selected as long as all of the wells and borings are on the same assessor's parcel or public right-of-way (see Section 4). A **boring** under this permit application is defined as a constructed hole lasting less than 24 hours before being properly destroyed. After 24 hours, the constructed hole is considered a **well** under this permit application which needs to be constructed appropriately unless special conditions are approved as part of the permit. If permit extension is selected, then write in the permit number of the permit to be extended. List the number of wells and borings anticipated to be drilled and what they will be named. This number may change in the field based on conditions encountered.

Section 2: Purpose of Drilling

At least one of the two boxes must be selected; however, both boxes may be selected as long as both purposes of drilling are to be conducted on the same assessor's parcel or public right-of-way (see Section 4). Geotechnical drilling may also be conducted under San Mateo County's Annual Geotechnical Drilling Permit in which consulting companies pay an annual fee to perform this type of drilling an unlimited amount of times for 365 days after obtaining the Annual Geotechnical Drilling Permit. Fees are listed at smchealth.org/ehfees. Please note, a Notification Form (not available on website) similar to this Subsurface Drilling Permit Application must be completely filled out and submitted at least 2 business days (48 hours) prior to drilling under the Annual Geotechnical Drilling Permit.

Section 3: Lead Agency

One of the three boxes must be selected. The EHS GPP would be selected only for investigations of known contaminated sites that the County is the lead agency. For drilling required by the Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the United States Environmental Protection Agency (USEPA), please include a copy of their approval letter. **None** would refer to investigations required by the County CUPA (Hazardous Materials Program), County Land Use or Solid Waste Programs, County or City Planning or Building Departments or voluntary investigations for due diligence or property transactions.

Section 4: Drilling Information

All applicable spaces must be filled in. **Agency Case #** refers to the lead agency's case number, if overseen by an agency, for the project under which the investigation is being conducted. **Assessor's parcel number** is the 9-digit number corresponding to the specific private property the drilling is proposed to be conducted on (can be found under Secured Property Taxes at sanmateocountytaxcollector.org or [here](#)). Each permit **must** include only one assessor's parcel number. If the drilling is to be conducted only in public right-of-ways, then the assessor's parcel number space should be filled in with N/A for not applicable. If drilling is to occur on both a private property and a contiguous public right-of-way, then two permits (one for the private property and one for the public right-of-way) must be filled out. **Address, City, and Zip** refer to the location of the specific property drilling is proposed to be conducted on. The address for a public right-of-way would simply be the name of the specific section of the public right-of-way (ie. 100 block of Main Street). **To be Constructed in** must have one box selected. Again, this differentiates between a public right-of-way and a private property. **Refuse** is a special land use designation which needs to be indicated on the permit application.

PERMIT APPLICATION INSTRUCTIONS AND FEES (CONTINUED)

Section 4: Drilling Information (continued)

The rest of this section is self-explanatory, may change in the field based on conditions encountered, and must be filled in except **Destruction Method for borings only**. Schematics may be submitted instead of filling in the well construction details, particularly if wells will be constructed differently from each other.

Destruction Method requires the use of a maximum of 7 gallons of water per 94 pounds of cement. This measurement (for both water and cement) must be able to be demonstrated in the field upon request from the inspector (such as using a 5-gallon bucket for measuring the water and using entire bags of cement). For **pressure grouting**, the well construction log and grout calculations must be submitted. The sand pack may not be more than 3 feet above the top of the screened interval, the screened interval may not be longer than 25 feet, and the bottom of the original boring may not be more than 2 feet deeper than the bottom of the constructed well. The total depth of the well and the fact that there are no obstructions in the well must be verified in the field. Type I/II cement grout must be tremied into the well, followed by application of 25 psi pressure maintained for 5 minutes. If the well does not meet pressure grouting criteria, it must be destroyed by drilling out to the total depth of the original boring. For **overdrilling**, the well casing and all annular material must be removed using a guide rod for the entire depth of the well inserted prior to drilling, and the boring tremie grouted to the surface using Type I/II cement grout. A general observation is that grouting borings using a ¾ inch PVC pipe, typically used to collect grab groundwater samples in borings, does not work with a screened section. Free falling grout is only allowed if the boring is dry, or if water is present in less than 10% of the boring, and less than 30 feet deep. Grout calculations must be provided in a well destruction workplan.

Section 5: Well/Boring Owner

The **name** of the entity owning the wells and borings must be listed along with their contact person (if different from the name of the well/boring owner), address, telephone number, and email address. The **contact person** must be directly associated with or an agent of the entity owning the wells and borings such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **phone** number and an **email** address must be provided to allow the inspector to contact the well/boring owner to verify information if necessary. By providing an email address, the well/ boring owner will receive an electronic copy of the permit. The permit application must be **signed** and **dated** by either the entity listed as the owner of the wells and borings or the contact person. **Signatures (Sections 5 through 8)** do not need to be original; however, one copy of the permit application must contain all of the information besides the signatures in a legible format. **ALL SIGNATURES REQUIRED (SECTIONS 5 THROUGH 8) DO NOT NEED TO BE ON THE SAME COPY OF THE PERMIT APPLICATION.**

Section 6: Property Owner

The **name** of the entity owning the property must be listed and needs to match the name listed with the County Assessor for this property. The **contact person** must be directly associated with or an agent of the entity owning the property such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **telephone** number and an **email** address must be provided to allow the inspector to contact the property owner to verify information if necessary. By providing an email address, the property owner will receive an electronic copy of the permit. The permit application must be signed and dated by the entity listed as the property owner only.

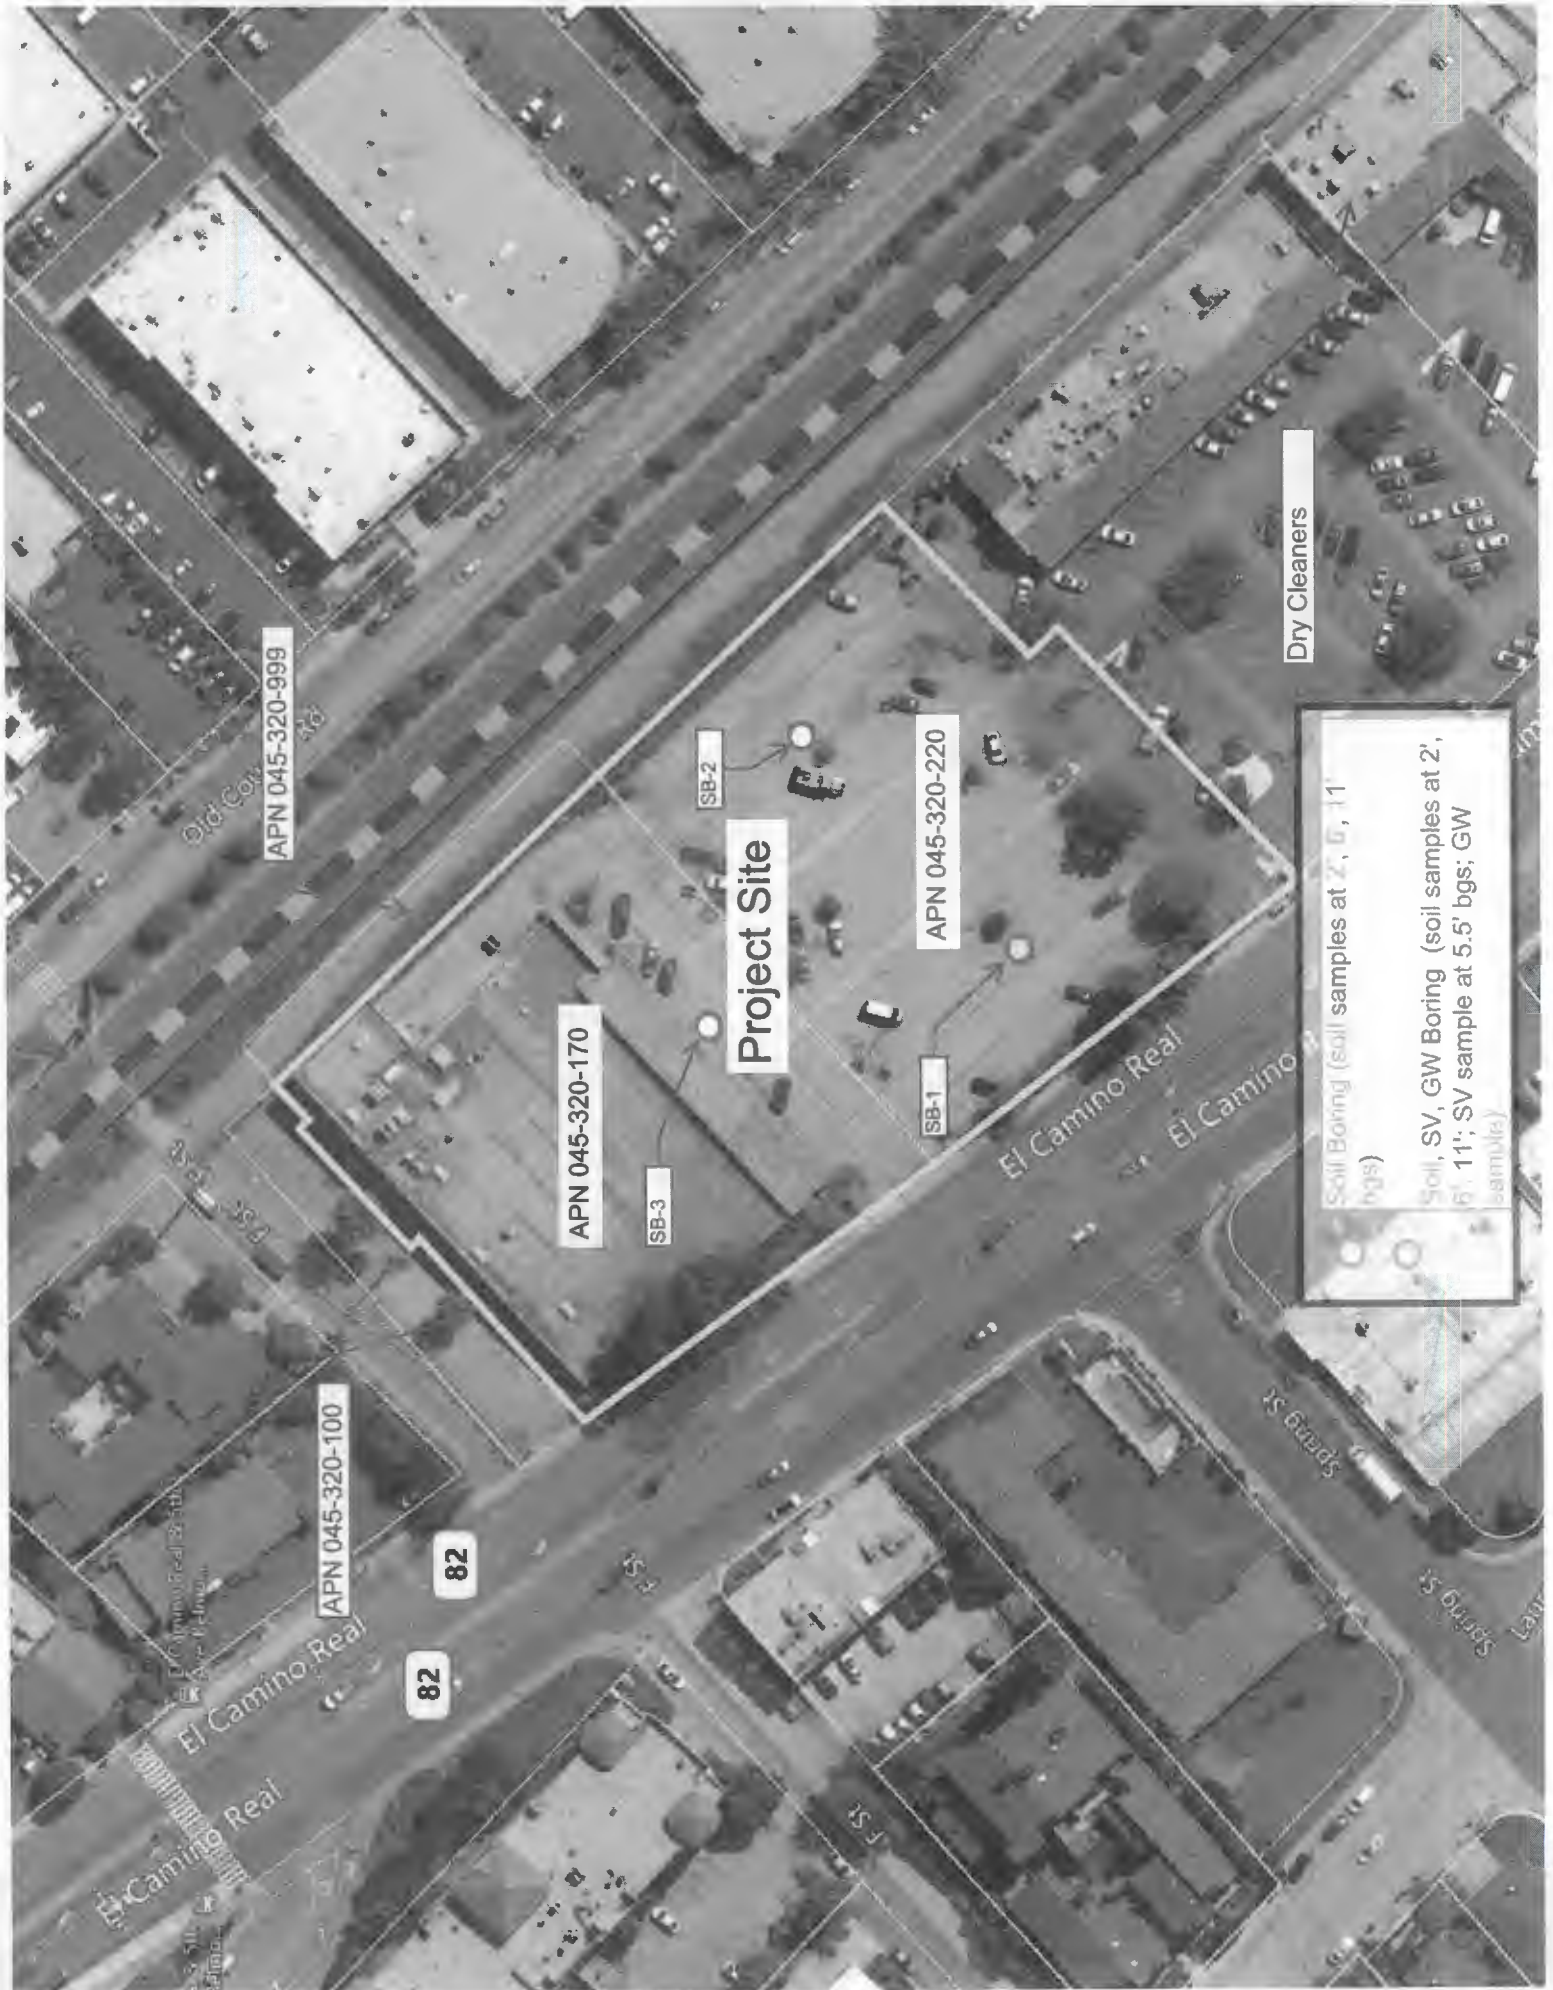

AGENTS CANNOT SIGN FOR THE PROPERTY OWNER. For public rights-of-way, a copy of the encroachment permit can be substituted for the property owner signature. The City of San Mateo, among others, will not issue an encroachment permit until the subsurface drilling permit is issued, but the City of San Mateo will issue a letter of intent to issue an encroachment permit which is acceptable as a substitute for the property owner signature in City of San Mateo rights-of-way.

Section 7: Drilling Company

The **name** of the company proposed to drill the wells and borings must be listed along with the drilling company **contact person, address, phone number, and email address**. In addition, the **driller's C57 license number** must be provided. By providing an email address, the drilling company will receive an electronic copy of the permit. The permit application must be signed and dated by the driller's contact person. If the drilling company changes, then a new subsurface drilling permit application should be filled out completely except for Sections 5, 6, and 8.

Section 8: Consulting Company

The **name** of the company overseeing the proposed drilling of the wells and borings must be listed along with the **project manager, address, phone number, and email address**. The responsible professional overseeing the work must **print** their name legibly, **sign** their name and date, and provide either their **California Professional Geologist or Civil Engineering number**. Field contact name and number, if known, are optional but beneficial for all parties involved.

 Overdrilling (guide rods for total depth prior to starting required)
 (6 gallons water max/94 lb cement, up to 5% bentonite)

WELL/BORING OWNER (Well/boring owner name or contact person should match signature)

Name: SummerHill Apartment Communities Contact Person: Richard Norris

Address: 777 South California Ave City, State, Zip: Palo Alto, CA 94304

Telephone: 650-842-2411 Email: RNorris@shapartments.com

It is my responsibility to notify the County of any known changes in the purpose of this well/boring from that which is indicated on this application, to submit indication of annual usage of wells to the County, and to maintain the well in good condition. (Letter signed by well/boring owner/contact person, containing above language and attesting to knowledge of all permit requirements and conditions, may be substituted for signature.)

Well/Boring Owner's/Contact Person's Signature: [Signature] Date: 3/31/21

PROPERTY OWNER (Name as appears on assessor's roles should match signature)

Name: Longs Drug Stores California, L.L.C. Contact Person: Stephen LaBonge

Address: One CVS Drive City, State, Zip: Woonsocket, RI 02895

Phone: 925-665-9659 Email: stephen.labonge@cvshealth.com

I understand that a well/boring is being installed on my property. I agree to notify the County and Well Owner of any known damage or future access issues to the well (Letter signed by property owner, containing above language, or encroachment permit may be substituted for signature)

Property Owner's Signature: [Signature] Date: Apr 19, 2021
Property Owner is signing for consent only and does not assume any responsibilities or liability hereunder.

DRILLING COMPANY

Drilling Company: Cascade Drilling, L.P. Contact Person: Kiel Hendricks

Address: 3451 Collins Ave City, State, Zip: Richmond, CA 94806

Phone: 317-519-7600 Email: KHendricks@cascade-env.com C57 Drillers License # 1058336

I certify that the well/boring will be constructed in compliance with the conditions of this permit (see reverse), the San Mateo County Well Ordinance, and the State Water Well Standards, and that the license listed above is considered current and active by the Contractors State License Board.

Driller's Signature: [Signature] Date: _____

CONSULTANT COMPANY

Consultant Company: Arcadis U.S., Inc Project Manager: Justin Sobieraj

Address: 100 Smith Ranch Road, STE 328 City, State, Zip: San Rafael, CA 94903

Telephone: 415.858.8310 Email: justin.sobieraj@arcadis.com

Field Contact & Cell # (if known): Asha Turman cell 925-381-9509

I certify that this application is correct to the best of my knowledge and the well/boring will be constructed/destroyed in compliance with the conditions of this permit (see page 2), the San Mateo County Well Ordinance, and the State Water Well Standards. I understand that I am responsible for General Conditions E, F, K, and L of this permit and if I indicated the purpose of drilling is geotechnical, then no one will use the boring to collect any samples for environmental analyses. If there is a change in Responsible Professional, I will notify San Mateo County GPP staff.

Responsible Professional's Name (Please print legibly): Justin Sobieraj Digitally signed by Justin Sobiera

Responsible Professional's Signature: Justin Sobieraj Date: 2021.04.20 15:05:46 -0700

California Professional Geologist (PG) No. 8524 or Civil Engineer (PE) No. _____ Page 2 of 5

SUBSURFACE DRILLING PERMIT APPLICATION CHECKLIST

CHECKLIST

- Legibly filled in all appropriate blanks and boxes, except signature and date (review instructions to verify appropriate fields to leave any lines blank or unchecked).
- Have all required signatures (can be on separate pages, do not need to be wet signatures).
- Include appropriate fee with application. Payment can be made by credit card over phone to (650) 372-6200 (indicate when and how application submitted).
- Include scaled site map of site in relation to cross streets and drilling location in relation to site features.
- Show approximate location(s) and ID/Name of well/borings.
- For well installations, indicate (i.e. mark on permit application) anticipated destruction method of these wells. May be asked to provide written description for small diameter (<2") wells.
- For well destructions via pressure grouting, included well construction logs and grout volume calculations. An approved work plan is required for all well destructions.
- Shallow (<10') vapor wells do not need to be permitted. However, still must comply with well standards for installation and destruction (i.e. do not use bentonite alone in vadose zone for sanitary seal and remove all non-native material).
- Notify permitting inspector 2 full working days prior to start of drilling.
Separate notification to case worker if known contaminated site.
- Consultant must submit all required information within 60 days of drilling (preferably to drilling@smcgov.org).
- For Borings and wells: require logs, site map, and analytical data.
- For wells: require surveyed coordinates and elevation, Well Completion Report (or indicate upload to Department of Water Resources Online System of Well Completion Reports DWR's OSWCR).

COMMON MISTAKES TO AVOID ON APPLICATION

Listed **potential** buyer as Property Owner,

Listed case's address rather than drilling location's address.

Failed to include Assessor's Parcel Number of the drilling location.

- Provided variance justification memo if temporary wells/borings may need to be left open for more than 24 hours to wait for groundwater recharge with estimate of maximum time needed.

- Permit is for **one mobilization** only. If work included in this permit cannot be done in a single mobilization, another permit may be required.

- Well owner must submit indication of annual use of wells (monitoring reports in association with corrective action requests satisfies this requirement); otherwise, wells need to be destroyed within year of last originally intended use.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

SUBSURFACE DRILLING PERMIT APPLICATION

REQUIREMENTS

An accurate and correct map **must** be submitted with the application and include the following: north arrow, existing and historic site features, existing and proposed well/boring locations with ID's to scale, property lines and any other pertinent information. A work plan describing the drilling and construction/destruction methodology **must** be submitted to County staff. A complete application with appropriate fees **must** be submitted 3 working days in advance of drilling and notification of start date and time **must** be provided at least 2 working days prior to drilling. The permit is subject to both General and Special Conditions stated below. A copy of the approved Subsurface Drilling Permit **must** be available on site while work related to the permit is being performed. **Drilling may begin at the notified date and time whether County staff is present or not.**

GENERAL CONDITIONS

- A. **Field notification must be provided to GPP drilling inspection staff at least 2 full working days prior to the start of drilling. GPP Caseworker also must be notified if site is associated with a remedial action case.**
- B. Well and boring construction and destruction under this permit are subject to the Standards for the Construction of Wells in San Mateo County, County Groundwater Protection Program (GPP) Guidelines, Policies & Procedures, the State Water Well Standards, and any instructions by EHS representative.
- C. Well/Boring Owner, Driller, and Responsible Professional assume responsibility for all activities and uses under the permit, including compliance with Workmen's Compensation Laws, and indemnify, defend and save the County of San Mateo, its officers, agents and employees, free and harmless from any and all expense, cost, or liability in connection with or resulting from work or stopped-work associated with the permit, including, but not limited to, property damage, personal injury, wrongful death, and loss of income.
- D. All borings **must** be properly destroyed (grouted/sealed) within 24 hours of drilling, unless special conditions are approved beforehand in writing as part of this permit, and **must** be continuously protected and stabilized.
- E. Analytical results of all soil, vapor, and groundwater samples collected during the execution of drilling under this permit **must** be submitted to County GPP staff by the Responsible Professional within 60 days of sample collection. If contamination is discovered during drilling, verbal notification to County GPP by the Responsible Professional is **required** within 72 hours of discovery. Proper storage, labeling & disposal of investigation-derived residual wastes are the responsibility of the consultant unless stated otherwise contractually.
- F. Boring logs, well construction details, and finalized as-built location map for all borings/ wells (except geotechnical borings) signed by a Responsible Professional, **must** be submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction. DWR Form 188 **must** be filed with the State per water code 13752.
- G. Permit is valid only for the purpose specified herein. No change in purpose or required procedures, as described on this permit application, in the associated workplan, or in the special conditions below, will be allowed except upon written permission from the County. Construction aspects can be changed based on conditions encountered in the field.
- H. **Permit is valid for one mobilization** associated with originally permitted boring/well locations only, including contingency locations, and is automatically canceled if not exercised, or if an extension is not applied for and granted within 120 days of the original permit issuance date. Failure to notify staff of cancellation or delay in start time will result in the Consultant being billed an inspection cancellation fee if GPP staff attempted to perform an inspection. Fees are listed at smchealth.org/ehfees.
- I. Wells installed under this permit may not be used for domestic, municipal, agricultural, or irrigation water supply.
- J. All work performed **must** conform to Business and Profession Codes and State Water Well Standards.
- K. Top-of-casing elevation of all wells **must** be surveyed to the nearest 0.01-foot relative to Mean Sea Level or NAVD88 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate. Geotechnical wells are exempt from this requirement if a written variance from GPP is obtained prior to drilling.
- L. Latitude and longitude of all wells **must** be surveyed with sub-meter accuracy relative to NAD83 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate.
- M. Violation of any requirement or general or special permit condition may result in an order by GPP staff to cease work under this permit, correct the violation, potentially re-permit the work as a new mobilization, and potential actions may be taken against the Well Owner, Property Owner, or Responsible Professional by GPP.

PERMIT APPLICATION INSTRUCTIONS AND FEES

A subsurface drilling permit for borings and wells is required if groundwater is anticipated to be encountered or if drilling extends to 10 feet or deeper. Sub-slab and vapor wells shallower than 10 feet do not require a permit. Should groundwater be encountered shallower than 10 feet unexpectedly, then contact San Mateo County EHS Groundwater Protection Program (GPP) immediately and a permit application will be required retroactively. GPP is the permitting agency for all subsurface drilling for environmental and geotechnical purposes within San Mateo County. San Mateo County EHS Land Use Program (LUP) reviews all water well permit applications (smchealth.org/enviro/forms) for public supply, domestic, agricultural, cathodic protection, exploratory, and geothermal heat exchange well construction and destruction and permit applications for all reconnaissance, investigation, and excavation work strictly for land use purposes. Please contact the LUP at (650) 372-6200 to discuss permitting, notification, and drilling requirements.

A 120-day extension may be granted for permits which have not been used during the original 120-day time frame. Submit another Subsurface Drilling Permit Application and payment for the permit extension fee at 50% of the fee for the type of drilling. Extension must be requested prior to the original permit expiring. If there are several wells and borings over several contiguous assessor's parcels and public right-of-ways, then discuss the fee with the County inspector at (650) 464-0047 or drilling@smcgov.org. The County inspector may charge only one fee for borings and wells constructed across contiguous assessor's parcels and public right-of-ways. However, this is dependent on how much the County inspector believes will need to be inspected in the field and how much review time of required submittals will be needed.

Section 1: Purpose of Application

At least one of the four boxes must be selected; however, multiple boxes may be selected as long as all of the wells and borings are on the same assessor's parcel or public right-of-way (see Section 4). A **boring** under this permit application is defined as a constructed hole lasting less than 24 hours before being properly destroyed. After 24 hours, the constructed hole is considered a **well** under this permit application which needs to be constructed appropriately unless special conditions are approved as part of the permit. If permit extension is selected, then write in the permit number of the permit to be extended. List the number of wells and borings anticipated to be drilled and what they will be named. This number may change in the field based on conditions encountered.

Section 2: Purpose of Drilling

At least one of the two boxes must be selected; however, both boxes may be selected as long as both purposes of drilling are to be conducted on the same assessor's parcel or public right-of-way (see Section 4). Geotechnical drilling may also be conducted under San Mateo County's Annual Geotechnical Drilling Permit in which consulting companies pay an annual fee to perform this type of drilling an unlimited amount of times for 365 days after obtaining the Annual Geotechnical Drilling Permit. Fees are listed at smchealth.org/ehfees. Please note, a Notification Form (not available on website) similar to this Subsurface Drilling Permit Application must be completely filled out and submitted at least 2 business days (48 hours) prior to drilling under the Annual Geotechnical Drilling Permit.

Section 3: Lead Agency

One of the three boxes must be selected. The EHS GPP would be selected only for investigations of known contaminated sites that the County is the lead agency. For drilling required by the Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the United States Environmental Protection Agency (USEPA), please include a copy of their approval letter. **None** would refer to investigations required by the County CUPA (Hazardous Materials Program), County Land Use or Solid Waste Programs, County or City Planning or Building Departments or voluntary investigations for due diligence or property transactions.

Section 4: Drilling Information

All applicable spaces must be filled in. **Agency Case #** refers to the lead agency's case number, if overseen by an agency, for the project under which the investigation is being conducted. **Assessor's parcel number** is the 9-digit number corresponding to the specific private property the drilling is proposed to be conducted on (can be found under Secured Property Taxes at sanmateocountytaxcollector.org or [here](#)). Each permit **must** include only one assessor's parcel number. If the drilling is to be conducted only in public right-of-ways, then the assessor's parcel number space should be filled in with N/A for not applicable. If drilling is to occur on both a private property and a contiguous public right-of-way, then two permits (one for the private property and one for the public right-of-way) must be filled out. **Address, City, and Zip** refer to the location of the specific property drilling is proposed to be conducted on. The address for a public right-of-way would simply be the name of the specific section of the public right-of-way (ie. 100 block of Main Street). **To be Constructed In** must have one box selected. Again, this differentiates between a public right-of-way and a private property. **Refuse** is a special land use designation which needs to be indicated on the permit application.

PERMIT APPLICATION INSTRUCTIONS AND FEES (CONTINUED)

Section 4: Drilling Information (continued)

The rest of this section is self-explanatory, may change in the field based on conditions encountered, and must be filled in except **Destruction Method for borings only**. Schematics may be submitted instead of filling in the well construction details, particularly if wells will be constructed differently from each other.

Destruction Method requires the use of a maximum of 7 gallons of water per 94 pounds of cement. This measurement (for both water and cement) must be able to be demonstrated in the field upon request from the inspector (such as using a 5-gallon bucket for measuring the water and using entire bags of cement). For **pressure grouting**, the well construction log and grout calculations must be submitted. The sand pack may not be more than 3 feet above the top of the screened interval, the screened interval may not be longer than 25 feet, and the bottom of the original boring may not be more than 2 feet deeper than the bottom of the constructed well. The total depth of the well and the fact that there are no obstructions in the well must be verified in the field. Type I/II cement grout must be tremied into the well, followed by application of 25 psi pressure maintained for 5 minutes. If the well does not meet pressure grouting criteria, it must be destroyed by drilling out to the total depth of the original boring. For **overdrilling**, the well casing and all annular material must be removed using a guide rod for the entire depth of the well inserted prior to drilling, and the boring tremie grouted to the surface using Type I/II cement grout. A general observation is that grouting borings using a ¾ inch PVC pipe, typically used to collect grab groundwater samples in borings, does not work with a screened section. Free falling grout is only allowed if the boring is dry, or if water is present in less than 10% of the boring, and less than 30 feet deep. Grout calculations must be provided in a well destruction workplan.

Section 5: Well/Boring Owner

The **name** of the entity owning the wells and borings must be listed along with their contact person (if different from the name of the well/boring owner), address, telephone number, and email address. The **contact person** must be directly associated with or an agent of the entity owning the wells and borings such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **phone number** and an **email address** must be provided to allow the inspector to contact the well/boring owner to verify information if necessary. By providing an email address, the well/ boring owner will receive an electronic copy of the permit. The permit application must be **signed and dated** by either the entity listed as the owner of the wells and borings or the contact person. **Signatures (Sections 5 through 8)** do not need to be original; however, one copy of the permit application must contain all of the information besides the signatures in a legible format. **ALL SIGNATURES REQUIRED (SECTIONS 5 THROUGH 8) DO NOT NEED TO BE ON THE SAME COPY OF THE PERMIT APPLICATION.**

Section 6: Property Owner

The **name** of the entity owning the property must be listed and needs to match the name listed with the County Assessor for this property. The **contact person** must be directly associated with or an agent of the entity owning the property such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **telephone number** and an **email address** must be provided to allow the inspector to contact the property owner to verify information if necessary. By providing an email address, the property owner will receive an electronic copy of the permit. The permit application must be signed and dated by the entity listed as the property owner only. **AGENTS CANNOT SIGN FOR THE PROPERTY OWNER.** For public rights-of-way, a copy of the encroachment permit can be substituted for the property owner signature. The City of San Mateo, among others, will not issue an encroachment permit until the subsurface drilling permit is issued, but the City of San Mateo will issue a letter of intent to issue an encroachment permit which is acceptable as a substitute for the property owner signature in City of San Mateo rights-of-way.

Section 7: Drilling Company

The **name** of the company proposed to drill the wells and borings must be listed along with the drilling company **contact person, address, phone number, and email address**. In addition, the **driller's C57 license number** must be provided. By providing an email address, the drilling company will receive an electronic copy of the permit. The permit application must be signed and dated by the driller's contact person. If the drilling company changes, then a new subsurface drilling permit application should be filled out completely except for Sections 5, 6, and 8.

Section 8: Consulting Company

The **name** of the company overseeing the proposed drilling of the wells and borings must be listed along with the **project manager, address, phone number, and email address**. The responsible professional overseeing the work must **print** their name legibly, **sign** their name and date, and provide either their **California Professional Geologist or Civil Engineering number**. Field contact name and number, if known, are optional but beneficial for all parties involved.

Lab Job Number: 444780
Project No: 30084302.00002
Location: II El Camino Real
Date Received: 04/30/21

This data package contains sample and QC results for nine soil samples, requested for the above referenced project on 05/03/21. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015M):

Low recovery was observed for diesel C10-C28 in the LCS for batch 266394; the low recovery was not associated with any reported results. Low recoveries were observed for diesel C10-C28 in the MS/MSD for batch 266394; the parent sample was not a project sample, and these low recoveries were not associated with any reported results. High RPD was also observed for diesel C10-C28; the high RPD was not associated with any reported results. Low surrogate recoveries were observed for n-triacontane in the LCS/MS/MSD for batch 266394. No other analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

Semivolatile Organics by GC/MS (EPA 8270C):

A number of samples were diluted due to the dark color of the sample extracts. SB-1-2 (lab # 444780-001) was diluted due to the dark and viscous nature of the sample extract. No other analytical problems were encountered.

Semivolatile Organics by GC/MS SIM (EPA 8270C-SIM):

High response was observed for benzo(g,h,i)perylene in the CCV analyzed 05/03/21 10:07; affected data was qualified with "b". Many samples were diluted due to the dark color of the sample extracts. SB-1-2 (lab # 444780-001) was diluted due to the dark and viscous nature of the sample extract. No other analytical problems were encountered.

Pesticides (EPA 8081A):

Low recoveries were observed for endosulfan sulfate and methoxychlor in the MSD of SB-1-2 (lab # 444780-001); the LCS was within limits. High recoveries were observed for a number of analytes in the MS/MSD of SB-1-2 (lab # 444780-001); the LCS was within limits, and these analytes were not detected at or above the RL in the associated samples. High RPD was observed for many analytes; these analytes were not detected at or above the RL in the associated samples. SB-1-2 (lab # 444780-001), SB-2-2 (lab # 444780-004), and SB-3-2 (lab # 444780-007) were diluted due to the dark color of the sample extracts. No other analytical problems were encountered.

PCBs (EPA 8082):

High RPD was observed for Aroclor-1260 in the MS/MSD of SB-1-2 (lab # 444780-001). No other analytical problems were encountered.

Metals (EPA 6010B and EPA 7471A) Soil:

Low recoveries were observed for antimony in the MS/MSD for batch 266373; the parent sample was not a project sample, the LCS was within limits, and the associated RPD was within limits. No other analytical problems were encountered.

Metals (EPA 6010B) TCLP Leachate:

No analytical problems were encountered.

Metals (EPA 6010B) WET Leachate:

No analytical problems were encountered.

Asbestos by PLM (Asbestos PLM):

SGS Forensic in Hayward, CA performed the analysis (not NELAP certified). Please see the SGS Forensic case narrative.

Asbestos by PLM (EPA 600/R-93-116):

SGS Forensic in Hayward, CA performed the analysis (not NELAP certified). Please see the SGS Forensic case narrative.

SAMPLE ACCEPTANCE CHECKLIST

Section 1
 Client: Arcadis Project: II El Camino Real
 Date Received: 05/01/2021 Sampler's Name Present: Yes No

Section 2
 Sample(s) received in a cooler? Yes, How many? 1 No (skip section 2) Sample Temp (°C) (No Cooler) : _____
 Sample Temp (°C), One from each cooler: #1: 3.6 #2: _____ #3: _____ #4: _____
(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)
 Shipping Information: _____

Section 3
 Was the cooler packed with: Ice Ice Packs Bubble Wrap Styrofoam
 Paper None Other _____
 Cooler Temp (°C): #1: 2.5 #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>		
Are sample IDs present?	<input checked="" type="checkbox"/>		
Are sampling dates & times present?	<input checked="" type="checkbox"/>		
Is a relinquished signature present?	<input checked="" type="checkbox"/>		
Are the tests required clearly indicated on the COC?	<input checked="" type="checkbox"/>		
Are custody seals present?		<input checked="" type="checkbox"/>	
If custody seals are present, were they intact?			<input checked="" type="checkbox"/>
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)	<input checked="" type="checkbox"/>		
Did all samples arrive intact? If no, indicate in Section 4 below.	<input checked="" type="checkbox"/>		
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>		
Were the samples collected in the correct containers for the required tests?	<input checked="" type="checkbox"/>		
Are the containers labeled with the correct preservatives?	<input checked="" type="checkbox"/>		
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			<input checked="" type="checkbox"/>
Was a sufficient amount of sample submitted for the requested tests?	<input checked="" type="checkbox"/>		

Section 5 Explanations/Comments

Section 6
 For discrepancies, how was the Project Manager notified? Verbal PM Initials: _____ Date/Time _____
 Email (email sent to/on): _____ / _____
 Project Manager's response:

Subject: RE: [EXTERNAL] FW: 30084302.00002 II El Camino Real- Enthalpy Data (444780)

Richard,
Can you please run TCLP analysis for the following samples:
SB-1-6' Nickel
SB-2-6' Lead
SB-2-10' Nickel

We will need the results by COB 5/14.

Thank you,

Justin Sobieraj, PG

Richard,

We also will need to run the following samples:

STLC for Chromium

- SB-1- 10'
- SB-2- 2', -6' and -10'
- SB-3- 6'

STLC for Nickel

- SB-1-6'

Thank you,

Justin Sobieraj, PG

Total Composite Values of Fibrous Components:		Asbestos (ND)					

Tad Thrower, Laboratory Supervisor, Hayward Laboratory

Note: Limit of Quantification ('LOQ') = 1%. 'Trace' denotes the presence of asbestos below the LOQ. 'ND' = 'None Detected'.

Analytical results and reports are generated by SGS Forensic Laboratories (SGSFL) at the request of and for the exclusive use of the person or entity (client) named on such report. Results, reports or copies of same will not be released by SGSFL to any third party without prior written request from client. This report applies only to the sample(s) tested. Supporting laboratory documentation is available upon request. This report must not be reproduced except in full, unless approved by SGSFL. The client is solely responsible for the use and interpretation of test results and reports requested from SGSFL. SGSFL is not able to assess the degree of hazard resulting from materials analyzed. SGS Forensic Laboratories reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified. All samples were received in acceptable condition unless otherwise noted.

5/5/2021

Mr. Justin Sobieraj
Arcadis U.S., Inc.
101 Creekside Ridge Court
Suite 200
Roseville CA 95678

Project Name: 11 El Camino Real
Project #: 30084302
Workorder #: 2105022A

Dear Mr. Justin Sobieraj

The following report includes the data for the above referenced project for sample(s) received on 5/4/2021 at Eurofins Air Toxics LLC.

The data and associated QC analyzed by TO-15 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics LLC. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Monica Tran at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Monica Tran
Project Manager

LABORATORY NARRATIVE
EPA Method TO-15
Arcadis U.S., Inc.
Workorder# 2105022A

Two 1 Liter Summa Canister samples were received on May 04, 2021. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

All Quality Control Limit exceedances and affected sample results are noted by flags. Each flag is defined at the bottom of this Case Narrative and on each Sample Result Summary page.

Definition of Data Qualifying Flags

Ten qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

M - Reported value may be biased due to apparent matrix interferences.

CN - See Case Narrative.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Workorder #: 2105022B

Dear Mr. Justin Sobieraj

The following report includes the data for the above referenced project for sample(s) received on 5/4/2021 at Eurofins Air Toxics LLC.

The data and associated QC analyzed by Modified ASTM D-1946 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics LLC. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Monica Tran at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Monica Tran
Project Manager

LABORATORY NARRATIVE
Modified ASTM D-1946
Arcadis U.S., Inc.
Workorder# 2105022B

Two 1 Liter Summa Canister samples were received on May 04, 2021. The laboratory performed analysis via Modified ASTM Method D-1946 for Helium in air using GC/TCD. The method involves direct injection of 1.0 mL of sample.

Method modifications taken to run these samples are summarized in the table below. Specific project requirements may over-ride the EATL modifications.

<i>Requirement</i>	<i>ASTM D-1946</i>	<i>ATL Modifications</i>
Calibration	A single point calibration is performed using a reference standard closely matching the composition of the unknown.	A minimum of 5-point calibration curve is performed. Quantitation is based on average Response Factor.
Reference Standard	The composition of any reference standard must be known to within 0.01 mol % for any component.	The standards used by ATL are blended to a $\geq 95\%$ accuracy.
Sample Injection Volume	Components whose concentrations are in excess of 5 % should not be analyzed by using sample volumes greater than 0.5 mL.	The sample container is connected directly to a fixed volume sample loop of 1.0 mL on the GC. Linear range is defined by the calibration curve. Bags are loaded by vacuum.
Normalization	Normalize the mole percent values by multiplying each value by 100 and dividing by the sum of the original values. The sum of the original values should not differ from 100% by more than 1.0%.	Results are not normalized. The sum of the reported values can differ from 100% by as much as 15%, either due to analytical variability or an unusual sample matrix.
Precision	Precision requirements established at each concentration level.	Duplicates should agree within 25% RPD for detections > 5 X's the RL.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

There were no analytical discrepancies.

Definition of Data Qualifying Flags

Seven qualifiers may have been used on the data analysis sheets and indicate as follows:

B - Compound present in laboratory blank greater than reporting limit.

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the detection limit.

M - Reported value may be biased due to apparent matrix interferences.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Resumes

LIZ RODRIGUEZ

Director, Mergers & Acquisitions – North America

CORE SKILLS

- Global M&A due diligence
- Environmental risk and opportunity assessments
- Regulatory compliance audits
- Health and safety
- Large industrial portfolio transactions
- Risk management and mitigation
- Business application of technical data
- Transaction closing support

QUALIFICATIONS

- BSc Biological Engineering

PROFESSIONAL AFFILIATIONS:

- Society of Women Engineers

Ms. Rodriguez leads the Arcadis North America Environmental Due Diligence practice. She has a wide range of experience in all aspects of conducting environmental due diligence in support of M&A transactions. In these roles, Liz coordinated, performed, and reviewed diligence assessments ranging from high-level reviews of multi-site portfolios to standard Phase I environmental site assessments (ESAs). These assessments were conducted on behalf of public and private corporations, private equity partnerships, lenders, insurance providers and other financial institutions in support of real estate or asset transactions, financing, insurance evaluation, or other business transactions. Liz also coordinated, performed, and reviewed regulatory compliance reviews, evaluated the probability of financial impact, and developed estimates of anticipated future costs and liabilities associated with known and potential contamination issues and regulatory compliance matters for numerous facility types within the context of a transaction. In this capacity, she objectively evaluated, prioritized and estimated environmental liabilities, and provided technical support and recommendations for managing such liabilities

DIVYA MEHTA

STAFF SCIENTIST

EDUCATION

BS, Biological Sciences, University of California, Irvine 2011
MPH with Concentration in Environmental Health, Boston University 2015

YEARS OF EXPERIENCE

Total - 5
With ARCADIS - 5

PROFESSIONAL REGISTRATIONS

OSHA 40-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER) since 2015
First Aid CPR AED Trained since 2016

Ms. Mehta is an environmental scientist with more than five years of experience in environmental due diligence, compliance assessments, product stewardship, and toxicology. She has coordinated and performed numerous Phase I Environmental Site Assessments (Phase I ESAs) in support of asset and real estate transactions. Ms. Mehta has conducted Phase I ESA's for a range of facilities including pharmaceutical manufacturing, medical device manufacturing, biotechnology manufacturing, small- and large-scale manufacturing, commercial retail, and banking properties. She has performed several Limited Compliance Assessments to evaluate facility compliance with both local and national regulations including hazardous waste storage, materials storage, air emissions, and stormwater permitting. She has provided product stewardship support to evaluate compliance of laboratory reagents and biological products with chemical and biological regulations in several countries including, among others, New Zealand and Thailand. Ms. Mehta has also provided toxicological support to large capitalization pharmaceutical clients to develop aquatic exposure guidelines for wastewater discharge.

Project Experience

Environmental Assessments

Phase I Environmental Site Assessments Pharmaceutical Production Facilities

Ms. Mehta was responsible for report writing and site visits for pharmaceutical production facilities in California, Massachusetts, New Hampshire, and Pennsylvania. Tasks for the assessment included a walk-through of the facilities and a review of materials storage, hazardous waste generation, wastewater generation, and air emissions. Ms. Mehta reviewed historical documents (i.e. aerial photography) as well as state and federal databases to assess environmental impacts from on and off-site operations. The findings from the assessment were utilized to evaluate environmental risk and potential liability for historical on and off-site activities.

Phase I Environmental Site Assessments Medical Device Manufacturing Facilities

Ms. Mehta was responsible for report writing and site visits for medical device manufacturing facilities in California, Massachusetts, and New Hampshire. Tasks for the assessment included a walk-through of the facilities and a review of materials storage, hazardous waste generation, wastewater generation, and air emissions. Ms. Mehta reviewed historical documents (i.e. aerial photography) as well as state and federal databases

Project Experience Continued

to assess environmental impacts from on and off-site operations. The findings from the assessment were utilized to evaluate environmental risk and potential liability for historical on and off-site activities.

Phase I Environmental Site Assessments

Biotechnology Manufacturing Facilities

Ms. Mehta was responsible for report writing and site visits for medical device manufacturing facilities in California and New Hampshire. Tasks for the assessment included a walk-through of the facilities and a review of materials storage, hazardous waste generation, wastewater generation, and air emissions. Ms. Mehta reviewed historical documents (i.e. aerial photography) as well as state and federal databases to assess environmental impacts from on and off-site operations. The findings from the assessment were utilized to evaluate environmental risk and potential liability for historical on and off-site activities.

Phase I Environmental Site Assessments

Manufacturing Facilities

Ms. Mehta was responsible for report writing and site visits for both small- and large-scale manufacturing facilities in Arkansas, California, Kansas, Kentucky, Louisiana, Massachusetts, Michigan, Missouri, Nevada, and New Hampshire. Tasks for the assessment included a walk-through of the facilities and a review of materials storage, hazardous waste generation, wastewater generation, and air emissions. Ms. Mehta reviewed historical documents (i.e. aerial photography) as well as state and federal databases to assess environmental impacts from on and off-site operations. The findings from the assessment were utilized to evaluate environmental risk and potential liability for historical on and off-site activities.

Phase I Environmental Site Assessments

Bank and Retail Properties

Ms. Mehta was responsible for report writing and site visits for both bank and commercial retail properties in California, Colorado, Kansas, Michigan, Minnesota, Missouri, New Hampshire, North Carolina, Ohio, Pennsylvania, and Washington. Tasks for the assessment included a walk-through of the facilities and a review of materials storage, hazardous waste generation, wastewater generation, and air emissions. Ms. Mehta reviewed historical documents (i.e. aerial photography) as well as state and federal databases to assess environmental impacts from on and off-site operations. The findings from the assessment were utilized to evaluate environmental risk and potential liability for historical on and off-site activities.

Compliance Reviews

Limited Compliance Assessments

Manufacturing Facilities

Ms. Mehta was responsible for limited compliance reviews for manufacturing facilities in Arkansas, California, Colorado, Canada, Michigan, and the UK. The assessment was conducted to evaluate the facility's compliance with local and national regulations pertaining to materials storage, hazardous waste storage, air emissions, and stormwater permitting. These assessments were primarily conducted for buy-side transactions to evaluate current and future environmental liability.

Project Experience Continued

Limited Compliance Assessments

Transport Vehicle Maintenance Facilities

Ms. Mehta was responsible for two limited compliance reviews for transport vehicle maintenance facilities in Arkansas and Louisiana. The assessment was conducted to evaluate the facility's compliance with local and national regulations pertaining to materials storage, hazardous waste storage, air emissions, and stormwater permitting. These assessments were primarily conducted for buy-side transactions to evaluate current and future environmental liability.

Product Stewardship Support

Regulatory Analysis Summaries

Confidential Client, Global

Ms. Mehta generated regulatory analysis summaries for an international client to assess compliance with national chemical and biological regulations. Products evaluated included analytical chemical laboratory reagents and biological products. She conducted these assessments for products in several countries including, among others, New Zealand and Thailand.

Toxicology Support

Development of Predicted No-Affect Concentrations Exposure Guidelines for Active Pharmaceutical Ingredients Used in Human Healthcare Products

Confidential Client, Global

Ms. Mehta developed predicted no-affect concentrations (PNECs) for 25 human health active pharmaceutical ingredients (APIs). The PNECs were generated for human health, environmental, and anti-microbial resistance. The PNEC values were derived primarily based on published values (i.e. AMR Industry Alliance) as well as acute and chronic toxicology data.

Development of Aquatic Exposure Guidelines for Active Pharmaceutical Ingredients Used in Animal Healthcare Products

Confidential Client, Global

Ms. Mehta developed aquatic exposure guidelines (AEGs) for 35 veterinary APIs using risk-based approaches. This work was performed to support the client's product stewardship and risk-management objectives. AEGs were determined using regulatory approaches applicable to waters of the United States and Europe. Data collection relied on toxicological, microbiological, and physical-chemical property information provided directly by the client as well as *de novo* literature searches.

Appendix F

User Questionnaire

USER QUESTIONNAIRE

AS REQUIRED by ASTM Standard E1527-13 or E 2247-08

Person Completing Questionnaire:

Richard Norris

Title / Relation to Site: SHAC Dev Mgr

Phone: (650) 842-2411

Date: 06/02/2021

Pages Attached: 0

Site Name: 11 El Camino Real

Site Address: 11 El Camino Real, San Carlos, CA 94070

Please fill in this form to the best of your ability, explaining any Yes answers in the space provided or on a separate sheet of paper. Without response to the User Questionnaire, our report would have to note that the report is incomplete. Please provide response to the User Questionnaire prior to the site reconnaissance.

1. **Environmental Cleanup Liens.** ASTM requires the User to check for environmental liens and Activity and Use Limitations (AULs) that may be filed or recorded against the subject property under federal, tribal, state or local law or to include the review of environmental liens.

Are you aware of any such liens against the subject property? Yes No Unknown

2. **Activity and Use Limitations (AULs).** These include engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place at the subject property or filed under federal, tribal, state or local law.

Are you aware of any possible AULs involving the subject property? Yes No Unknown

3. **Specialized Knowledge.** This involves personal knowledge or experience related to the subject property or nearby properties. For example, if you are involved in the same line of business as the current or former occupants of the property or an adjoining property, you may know of any chemicals, oil, degreasers, gasoline, or other hazardous substances commonly used in that type of business.

Do you have any specialized knowledge that might indicate the past or present use of such substances on the subject or nearby properties Yes No Unknown

4. **Fair Market Value (FMV).** A purchase price significantly below FMV may indicate an environmental problem. Please note that this question does not require an appraisal of the property. If the price is significantly below FMV, the User should consider whether it might be because contamination may be present at the property.

Is the purchase price significantly below fair market value? Yes No Unknown

5. **Obvious Indicators.** This involves past or present spills, stains, releases, cleanups, etc. on or near the site.

Do you know of any obvious indicators of possible contamination on or near the site? Yes No

Do you know of spills or other chemical releases that have taken place at the property? Yes No

Do you know of any environmental cleanups that have taken place at the property? Yes No

USER QUESTIONNAIRE

AS REQUIRED by ASTM Standard E1527-13 or E 2247-08

6. Litigation, Administrative Proceedings or Government Notices.

Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? Yes No

Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? Yes No

Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Yes No

7. Common Knowledge. Please use a separate sheet if necessary.

a. Describe the past uses of the property:

Unknown beyond what has been relayed to us by Arcadis.

b. Describe any specific chemicals that may have been present at the property:

Unknown beyond what has been relayed to us by Arcadis.

c. Describe any other information that may help us identify possible contamination:

N/A

Subject:

Limited Phase II Environmental Site Investigation Memorandum
11 El Camino Real, San Carlos, California

ENVIRONMENT

Dear Mr. Norris:

Arcadis U.S., Inc. (Arcadis) has prepared this Limited Phase II Environmental Site Investigation Memorandum (Memorandum) concerning the 11 El Camino Real, California property (the Site; Figure 1) for SummerHill Apartment Communities (SummerHill). The purpose of the Limited Phase II Environmental Site Investigation was to obtain analytical data for various media that SummerHill requested as part of their due diligence activities.

Summary of Site Background

Based on a review of aerial photos, in 1943 the northern portion of the Site was developed with four rectangular structures and the southern portion of the Site included a portion of a larger building. By 1950, the northern portion of the Site was developed with one larger one-story building and two adjoining smaller one-story buildings, and the southern portion of the Site remained developed with a portion of a large commercial building. The building along the southern portion of the Site appeared vacant as of 1950. The buildings in the northern and southern portions of the Site had been demolished by 1970 and 1974, respectively. The Site remained vacant until sometime prior to 1982, when the current Site building was constructed in the northern portion of the Site and the southern portion of the Site was developed with the current asphalt-paved parking lot. No significant changes were evident through the present. The Site use was reportedly sign manufacturing and steel plating operations starting in 1950. By 1968, the buildings in the northern portion of the Site were used for carpet and boat storage, and the building along the southern portion of the Site was operated as a cabinet shop. The current Site building was operated as a Longs Drug Store between 1986 and 2009 and by CVS from 2010 through the present.

Mr. Richard Norris

June 1, 2021

Scope of Work

Three soil boring locations were advanced throughout the Site (Figure 2) for the collection of soil, groundwater, and soil-vapor samples. The soil sample data will be used to evaluate if the soil can be reused or if disposal at an offsite facility is necessary based on Department of Toxic Substances Control (DTSC) import fill guidance. The soil-vapor sample data will be used to assess the presence of volatile organic compounds (VOCs) in soil vapor and to evaluate the need for vapor mitigation in the future development design. The groundwater sample will be used to evaluate the presence of VOCs in groundwater from potential off-site and/or on-site sources.

Pre-Field Activities

Site-Specific Health and Safety Plan

As required by the Occupational Safety and Health Administration (OSHA) Standard “Hazardous Waste Operations and Emergency Response” guidelines (29 Code of Federal Regulations Section 1910.120), and by California Occupational Health and Safety Administration (Cal-OSHA) “Hazardous Waste Operations and Emergency Response” guidelines (California Code of Regulations Title 8, Section 5192), Arcadis prepared a site-specific health and safety plan (HASP) prior to commencing fieldwork. All field staff and contractors reviewed the HASP before beginning field operations at the Site.

Permitting

A subsurface drilling permit for the advancement of three soil borings was obtained from the San Mateo County Department of Environmental Health (SMCDEH). A copy of the SMCDEH boring permit is included as Attachment 1.

Underground Utility Locating

On April 30, 2021, Arcadis subcontracted a private utility locator, Ground Penetrating Radar Systems, Inc. (GPRS), prior to conducting subsurface work at the Site. Each proposed boring location was cleared of underground utilities by ground penetrating radar. In addition, Underground Service Alert (USA) was notified a minimum of 48 hours prior to commencing intrusive field activities to identify any public utility alignments that may conflict with the proposed borings.

Mr. Richard Norris

June 1, 2021

Field Activities

Soil Boring Advancement and Sampling

On April 30, 2021, Arcadis oversaw Cascade Drilling, LLC. (Cascade) as they advanced three soil borings (SB-1 through SB-3) using a hand auger at the locations shown on Figure 2. Boring SB-1 was advanced to approximately 11 feet below ground surface (bgs), and SB-2 and SB-3 were advanced to 10 feet bgs. Three soil samples were collected from each boring at approximately two, six, and 10 feet bgs.

Soil cores collected from all borings were classified using visual and manual methods, and described in accordance with the Unified Soil Classification System. In addition, relative VOC concentrations were measured with a photoionization detector (PID) from soil head space. The soil screening procedures included measuring approximately 30 grams from a relatively undisturbed soil sample and placing this sample in a sealed container (zip-lock bag). After approximately 20 minutes, the head space within the bag was tested for total VOC concentrations, measured in parts per million. The PID results are noted on the field boring logs along with observations of staining, odors, and other soil characteristics, where applicable. Boring logs are included in Attachment 2.

All soil samples were collected in laboratory-supplied containers and submitted to Enthalpy Analytical (Enthalpy), a California Department of Health Services-certified laboratory under appropriate chain-of-custody protocols and were analyzed using the following analytical methods:

- California Assessment Manual (CAM) 17 metals using United States Environmental Protection Agency (USEPA) Method 6010B/7471A;
- VOCs using USEPA Method 8260B
- Semi-volatile organic compounds (SVOCs) using USEPA Method 8270C (with Selective Ion Monitoring [SIM]); and
- Total petroleum hydrocarbon (TPH) as gasoline, TPH as diesel (TPHd), and TPH as motor oil (TPHmo) using USEPA Method 8015M with silica gel cleanup.

Shallow samples collected from all borings at approximately two feet bgs were additionally analyzed using the following analytical methods:

- Organochlorine pesticides (OCPs) using USEPA Method 8081A;
- Polychlorinated biphenyls (PCBs) using USEPA Method 8082; and
- Asbestos by USEPA Method Polarized Light Microscopy (PLM) 600/R-93/116.

Mr. Richard Norris

June 1, 2021

Soil analytical results are presented in Table 1.

Soil-Vapor Probe Installation

Cascade converted boring SB-1 into a soil-vapor probe (SVP) at the location SVP-1, shown on Figure 2. The SVP was constructed with a 6-inch long stainless-steel screen within a 1-foot interval of sand pack from approximately five to six feet bgs allowing approximately three inches of sand above and below the screen. The sand pack was covered with a 1-foot interval of dry granular bentonite. The remainder of the borehole was filled with hydrated granular bentonite with a 0.5-foot cement cap at the top of the borehole. The SVP assembly consisted of a stainless-steel permeable probe tip, a length of ¼-inch outside-diameter Teflon tubing and a vapor-tight cap (such as Swagelok® cap) to prevent infiltration of water or ambient air into the subsurface. A 6-inch traffic-rated well box was installed at surface grade to protect the SVP for resampling (if required).

Temporary Well Installation and Grab-Groundwater Sampling

During the advancement of borings SB-1 and SB-3 to depths of 11 feet and 10 feet respectively, groundwater was not encountered. On May 3, 2021, in an attempt to collect a groundwater sample, boring location SB-2 was advanced using a direct push technology (DPT) drill rig until encountering refusal at approximately 30 feet bgs. Groundwater was not encountered in SB-2. Due to the lack of groundwater encountered, grab groundwater samples could not be collected from the advanced borings.

Soil-Vapor Probe Sampling

After allowing the newly installed SVP-1 to equilibrate for a minimum of 48 hours, SVP-1 was sampled by Arcadis on May 3, 2021. Prior to collecting soil-vapor samples, the SVP was connected to a laboratory-supplied sample manifold and shut-in and quantitative leak tests were conducted, in accordance with California Environmental Protection Agency (CalEPA) guidance¹. The shut-in test involved assembling the aboveground valves, lines, and fittings downstream from the top of the SVP location and evacuating the sample manifold to a minimum measured vacuum of approximately 100 inches of water using a purge pump. The test was conducted while the sampling canister was attached with its valve in the closed

¹ California Environmental Protection Agency. 2015. Advisory – Active Soil Gas Investigations. July.

Mr. Richard Norris

June 1, 2021

position. The vacuum gauge was connected to the system with a tee fitting for at least one minute, and field staff observed and recorded the reading. If there was any observable loss of vacuum, the fittings were adjusted until the vacuum in the sample train did not noticeably dissipate. After the shut-in test was validated, the sampling train was not altered.

A leak test was performed to evaluate the integrity of the SVP and sample train and to confirm that ambient air was not introduced into the soil-vapor sample during the collection process. To ensure no leakage during sampling, the entire sampling train was placed under a sampling shroud. High purity grade helium was used as a tracer compound for each leak test. The tracer compound was permitted into the shroud and monitored for concentration stability using a handheld helium detector. Samples were not collected from the sample port until the leak test confirmed that leaks resulting in detections of helium above the accepted 5 percent allowable maximum were not present. Helium concentrations were recorded at the time of sample collection on the field sampling sheets included in Attachment 3. In addition, soil-vapor samples were analyzed for helium by American Society for Testing and Materials Method (ASTM D-1946) to further confirm the integrity of the sampling system.

Three purge volumes of stagnant and ambient air were removed from the sampling system via a purge pump so that samples collected would be representative of subsurface conditions. Each purge volume was determined based on the SVP construction (approximately 2,500 milliliters for the SVP screened at approximately 5.5 feet bgs). Sample collection information is provided on the field sampling data sheets (Attachment 3).

Following the shut-in test and leak check, stagnant air was purged from the SVP and transferred to a Tedlar[®] bag via plastic syringe or personal air sampling pump. Samples were collected in 1-liter Summa canisters, stopping sample collection once canisters reached 5 inches mercury (Hg), and analyzed by Eurofins AirToxics, a state-certified laboratory, for VOCs (USEPA Method TO-15).

In addition to pre-sampling QA/QC measures, one duplicate sample was collected. The duplicate sample was collected with both the parent and duplicate canisters connected in-line with an additional tee fitting.

Decontamination

All down-hole sampling equipment was triple-rinsed prior to deployment and following the completion of work at each boring location. Decontamination of non-

Mr. Richard Norris

June 1, 2021

dedicated or non-disposable field sampling equipment was conducted using an Alconox® solution and water rinse to prevent potential cross-contamination.

Investigation Derived Waste Management

Investigation derived waste (IDW), including soil cuttings and decontamination water was containerized in Department of Transportation-approved 55-gallon steel drums. The IDW is temporarily being stored at the Site in a location approved by the current owner, pending characterization. Once characterized the IDW will be disposed of at a state-licensed disposal facility.

Analytical Results

Soil Analytical Results

Soil analytical results for samples collected from borings SB-1 through SB-3 were compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening Levels (ESLs)². Additionally, arsenic results were compared to the established background range of arsenic in the San Francisco Bay Area (11 milligrams per kilogram [mg/kg])³. Soil analytical results for detections of TPH, VOCs, SVOCs, OCPs, and CAM 17 metals are included in Table 1. Laboratory analytical reports and chain-of-custody documentation are included in Attachment 4. Described below are constituents present in soil samples above their respective ESLs.

- Chlordane was detected above the ESL of 0.0085 mg/kg in the sample collected from SB-2 at 2 feet bgs at a concentration of 0.39 mg/kg.
- Aroclor-1260 was detected above the ESL of 0.23 mg/kg in the sample collected from SB-3 at 2 feet bgs at a concentration of 0.52 mg/kg.
- Cadmium was detected above the ESL of 1.9 mg/kg in the sample collected from SB-1 at 6 feet bgs at a concentration of 4.0 mg/kg.
- Cobalt was detected above the ESL of 23 mg/kg in the sample collected from SB-1 at 6 feet bgs at a concentration of 26 mg/kg.

² San Francisco Bay Regional Water Quality Control Board, 2019. Environmental Screening Levels. January (Revision 2).

³ Duverge. 2011. Establishing Background Arsenic in Soil of the Urbanized San Francisco Bay Region. December.

Mr. Richard Norris

June 1, 2021

- Lead was detected above the ESL of 32 mg/kg in the sample collected from SB-2 at 6 feet bgs at a concentration of 44 mg/kg. The Toxicity Characteristic Leaching Procedure (TCLP) concentration for this sample was <0.015 milligrams per liter (mg/L).
- Nickel was detected above the ESL of 86 mg/kg in samples collected from SB-1 at 6 feet bgs and SB-2 at 10 feet bgs at concentrations of 380 mg/kg and 87 mg/kg, respectively. SB-1 at 6 feet bgs TCLP and Soluble Threshold Limit Concentration (STLC) concentrations were 0.14 and 0.76 mg/L, respectively. SB-2 at 10 feet bgs TCLP result was <0.060 mg/L.
- Vanadium was detected above the ESL of 18 mg/kg in all samples collected at concentrations ranging from 29 mg/kg (SB-3 at 10 feet bgs) to 92 mg/kg (SB-1 at 6 feet bgs).

There were no additional ESL or background exceedances in collected soil samples.

Soil-Vapor Analytical Results

On May 3, 2021, one soil-vapor sample and one duplicate sample was collected at SVP-1 for analysis of VOCs using USEPA Method TO-15 and helium by ASTM D-1946. Soil-vapor analytical results for detected analytes and the results of the helium analysis are included in Table 2. The soil-vapor analytical results were compared to SFRWQCB residential subslab/soil gas Tier 1 ESLs. The data are presented in Table 2 and described below:

- Methylene Chloride was detected above the ESL (34 micrograms per cubic meter [$\mu\text{g}/\text{m}^3$]) in the samples at concentrations of 760 $\mu\text{g}/\text{m}^3$ (SVP-1) and 740 $\mu\text{g}/\text{m}^3$ (DUP-1).
- Benzene was detected above its ESL (3.2 $\mu\text{g}/\text{m}^3$) in the samples at concentrations of 5.7 $\mu\text{g}/\text{m}^3$ (SVP-1) and 5.5 $\mu\text{g}/\text{m}^3$ (DUP-1).
- 1,2-Dichloroethane (1,2-DCA) was detected above its ESL (3.6 $\mu\text{g}/\text{m}^3$) in the samples at concentrations of 13 $\mu\text{g}/\text{m}^3$ (SVP-1) and 14 $\mu\text{g}/\text{m}^3$ (DUP-1).
- Tetrachloroethene (PCE) was detected above its ESL (15 $\mu\text{g}/\text{m}^3$) in the samples at a concentration of 33 $\mu\text{g}/\text{m}^3$ in both samples SVP-1 and DUP-1.

Additional VOCs detected above their respective laboratory reporting limits included ethanol, toluene, xylenes, acetone, cyclohexane, hexane, heptane, carbon disulfide, methyl ethyl ketone (MEK), cis-1,2-dichloroethene, tetrahydrofuran, 2,2,4-trimethylpentane, trichloroethene, 4-methyl-2-pentanone, ethylbenzene, styrene, 4-ethyltoluene, 1,3,5-trimethylbenzene, and 1,2,4-trimethylbenzene. However, all of these additional VOCs were all below their respective ESLs (Table 2). Laboratory analytical reports and chain-of-custody documentation are included in Attachment 4.

Mr. Richard Norris

June 1, 2021

Soil-Vapor Sample QA/QC Evaluation

QA/QC procedures included field analyzing the soil-vapor sample for helium and collecting a duplicate sample at location SVP-1. There were no detections of VOCs above the laboratory reporting limits indicating the laboratory-supplied equipment (i.e., manifolds, summa canisters, tubing) was relatively free of contaminants.

To ensure no leakage during soil-vapor sampling, the entire sampling train was placed under a sampling shroud. Laboratory-grade helium was used as a tracer compound for each leak test. The tracer compound was permitted into the shroud and monitored for concentration stability using a helium detector. To verify that there was no leakage, each soil-vapor sample purge volume was field analyzed for helium. Helium was not detected in the soil-vapor samples collected indicating no ambient air leakage occurred during those sampling events.

Field duplicate sample (DUP-1) was collected from SVP-1. The relative percent difference (RPD) was within acceptable limits (50%) for all detected constituents except 4-Methyl-2-pentanone. 4-Methyl-2-pentanone was detected in the primary sample but was not detected above the laboratory reporting limit in the duplicate sample.

Conclusions

Soil samples collected from the three borings had detectable concentrations of TPHd and TPHmo. However, none of the samples contained these petroleum hydrocarbons at concentrations above their respective ESLs. In addition, chlordane, Aroclor-1260, and several metals were present in soil samples above their respective ESLs.

The analytical results for soil samples collected at the Site indicate that the soil likely would be characterized as non-hazardous and would possibly be acceptable to a potential receiver site. Final designation should be determined by the transport and disposal contractor in consultation with the selected disposal site.

Benzene and 1,2-DCA were detected in the soil-vapor sample. Benzene is a chemical found in petroleum hydrocarbons and 1,2-DCA historically was used as an additive for gasoline and likely is a petroleum hydrocarbon-related compound. The presence of petroleum hydrocarbon-related compounds in the soil-vapor sample may be attributed to either the Unocal Gas Station (#2913) or the Auto Pride Car Wash, both located approximately 400 feet southeast of the Site. Soil, groundwater, and soil-vapor investigations and remediation activities had been conducted at both the Unocal Gas Station and the Auto Pride Car Wash under the oversight of San Mateo

Mr. Richard Norris

June 1, 2021

County Environmental Health (SMCEH). The SMCEH issued a no further action letter for the Unocal Gas Station on February 4, 2014 and for the Auto Pride Car Wash on October 19, 2017.

PCE and methylene chloride were detected above their respective ESL in the soil-vapor sample. The presence of PCE in soil vapor may be attributed to San Carlos Dry Cleaners which is located approximately 250 feet southeast from the Site. Methylene chloride is a compound that historically has been used in various industrial processes, in many different industries including paint stripping, pharmaceutical manufacturing, paint remover manufacturing, and metal cleaning and degreasing. Chemicals including methylene chloride may have been used during historical site activities which included sign manufacturing, steel plating operations, and cabinet manufacturing.

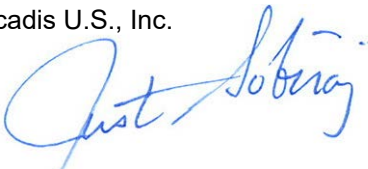

Based on the presence of PCE and methylene chloride in soil vapor above their ESLs, a vapor barrier is recommended beneath future ground level areas that include potential conduits (stairwells, elevator shafts, trash chutes) to the residential units above. The installation of a vapor barrier beneath potential conduits during future site development should be adequate to protect future inhabitants of the property.

Any future development at the Site should also include the preparation and utilization of a site-specific soil and groundwater management plan (SMP) to manage potentially impacted soil, soil vapor, and groundwater. The soil sampling analytical results indicate that soil removed during future development activities will likely be characterized as non-hazardous soil and require disposal at an appropriate disposal facility. The SMP will include a description of work protocols and potential chemical analyses that will be needed to accommodate future development of the Site, if any.

If you have any questions or comments regarding the contents of this Memorandum, please contact Justin Sobieraj at 415.858.8310 or by e-mail at Justin.Sobieraj@arcadis.com or Chuck Pardini at 415.915.8063 or by email at Chuck.Pardini@arcadis.com.

Sincerely,

Arcadis U.S., Inc.

CONSULTANT COMPANY

Consultant Company: Arcadis U.S., Inc Project Manager: Justin Sobleraj Address: 100 Smith Ranch Road, STE 328 City, State, Zip: San Rafael, CA 94903 Telephone: 415.858.8310 Email: justin.sobleraj@arcadis.com

Field Contact & Cell # (if known): Asha Turman cell 925-381-8509

I certify that this application is correct to the best of my knowledge and the well/boring will be constructed/destroyed in compliance with the conditions of this permit (see page 2), the San Mateo County Well Ordinance, and the State Water Well Standards. I understand that I am responsible for General Conditions E, F, K, and L of this permit and if I indicated the purpose of drilling is geotechnical, then no one will use the boring to collect any samples for environmental analyses. If there is a change in Responsible Professional, I will notify San Mateo County GPP staff.

SUBSURFACE DRILLING PERMIT APPLICATION CHECKLIST

CHECKLIST

- Legibly filled in all appropriate blanks and boxes, except signature and date (review instructions to verify appropriate fields to leave any lines blank or unchecked).
- Have all required signatures (can be on separate pages, do not need to be wet signatures).
- Include appropriate fee with application. Payment can be made by credit card over phone to (650) 372-6200 (indicate when and how application submitted).
- Include scaled site map of site in relation to cross streets and drilling location in relation to site features.
- Show approximate location(s) and ID/Name of well/borings.
- For well installations, indicate (i.e. mark on permit application) anticipated destruction method of these wells. May be asked to provide written description for small diameter (<2") wells.
- For well destructions via pressure grouting, included well construction logs and grout volume calculations. An approved work plan is required for all well destructions.
- Shallow (<10') vapor wells do not need to be permitted. However, still must comply with well standards for installation and destruction (i.e. do not use bentonite alone in vadose zone for sanitary seal and remove all non-native material).
- Notify permitting inspector 2 full working days prior to start of drilling.
Separate notification to case worker if known contaminated site.
- Consultant must submit all required information within 60 days of drilling (preferably to drilling@smcgo.org).
- For Borings and wells: require logs, site map, and analytical data.
- For wells: require surveyed coordinates and elevation, Well Completion Report (or indicate upload to Department of Water Resources Online System of Well Completion Reports DWR's OSWCR).

COMMON MISTAKES TO AVOID ON APPLICATION

Listed **potential buyer** as Property Owner,

Listed case's address rather than drilling location's address.

Failed to include Assessor's Parcel Number of the drilling location.

- Provided variance justification memo if temporary wells/borings may need to be left open for more than 24 hours to wait for groundwater recharge with estimate of maximum time needed.

- Permit is for **one mobilization** only. If work included in this permit cannot be done in a single mobilization, another permit may be required.

- Well owner must submit indication of annual use of wells (monitoring reports in association with corrective action requests satisfies this requirement); otherwise, wells need to be destroyed within year of last originally intended use.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

SUBSURFACE DRILLING PERMIT APPLICATION

REQUIREMENTS

An accurate and correct map **must** be submitted with the application and include the following: north arrow, existing and historic site features, existing and proposed well/boring locations with ID's to scale, property lines and any other pertinent information. A work plan describing the drilling and construction/destruction methodology must be submitted to County staff. A complete application with appropriate fees must be submitted 3 working days in advance of drilling and notification of start date and time must be provided at least 2 working days prior to drilling. The permit is subject to both General and Special Conditions stated below. A copy of the approved Subsurface Drilling Permit **must** be available on site while work related to the permit is being performed. **Drilling may begin at the notified date and time whether County staff is present or not.**

GENERAL CONDITIONS

- A. **Field notification must be provided to GPP drilling inspection staff at least 2 full working days prior to the start of drilling. GPP Caseworker also must be notified if site is associated with a remedial action case.**
- B. Well and boring construction and destruction under this permit are subject to the Standards for the Construction of Wells in San Mateo County, County Groundwater Protection Program (GPP) Guidelines, Policies & Procedures, the State Water Well Standards, and any instructions by EHS representative.
- C. Well/Boring Owner, Driller, and Responsible Professional assume responsibility for all activities and uses under the permit, including compliance with Workmen's Compensation Laws, and indemnify, defend and save the County of San Mateo, its officers, agents and employees, free and harmless from any and all expense, cost, or liability in connection with or resulting from work or stopped-work associated with the permit, including, but not limited to, property damage, personal injury, wrongful death, and loss of income.
- D. All borings **must** be properly destroyed (grouted/sealed) within 24 hours of drilling, unless special conditions are approved beforehand in writing as part of this permit, and must be continuously protected and stabilized.
- E. Analytical results of all soil, vapor, and groundwater samples collected during the execution of drilling under this permit **must** be submitted to County GPP staff by the Responsible Professional within 60 days of sample collection. If contamination is discovered during drilling, verbal notification to County GPP by the Responsible Professional is **required** within 72 hours of discovery. Proper storage, labeling & disposal of investigation-derived residual wastes are the responsibility of the consultant unless stated otherwise contractually.
- F. Boring logs, well construction details, and finalized as-built location map for all borings/ wells (except geotechnical borings) signed by a Responsible Professional, **must** be submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction. DWR Form 188 must be filed with the State per water code 13752.
- G. Permit is valid only for the purpose specified herein. No change in purpose or required procedures, as described on this permit application, in the associated workplan, or in the special conditions below, will be allowed except upon written permission from the County. Construction aspects can be changed based on conditions encountered in the field.
- H. **Permit is valid for one mobilization** associated with originally permitted boring/well locations only, including contingency locations, and is automatically canceled if not exercised, or if an extension is not applied for and granted within 120 days of the original permit issuance date. Failure to notify staff of cancellation or delay in start time will result in the Consultant being billed an inspection cancellation fee if GPP staff attempted to perform an inspection. Fees are listed at smchealth.org/ehfees.
- I. Wells installed under this permit may not be used for domestic, municipal, agricultural, or irrigation water supply.
- J. All work performed **must** conform to Business and Profession Codes and State Water Well Standards.
- K. Top-of-casing elevation of all wells **must** be surveyed to the nearest 0.01-foot relative to Mean Sea Level or NAVD88 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate. Geotechnical wells are exempt from this requirement if a written variance from GPP is obtained prior to drilling.
- L. Latitude and longitude of all wells **must** be surveyed with sub-meter accuracy relative to NAD83 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate.
- M. Violation of any requirement or general or special permit condition may result in an order by GPP staff to cease work under this permit, correct the violation, potentially re-permit the work as a new mobilization, and potential actions may be taken against the Well Owner, Property Owner, or Responsible Professional by GPP.

PERMIT APPLICATION INSTRUCTIONS AND FEES

A subsurface drilling permit for borings and wells is required if groundwater is anticipated to be encountered or if drilling extends to 10 feet or deeper. Sub-slab and vapor wells shallower than 10 feet do not require a permit. Should groundwater be encountered shallower than 10 feet unexpectedly, then contact San Mateo County EHS Groundwater Protection Program (GPP) immediately and a permit application will be required retroactively. GPP is the permitting agency for all subsurface drilling for environmental and geotechnical purposes within San Mateo County. San Mateo County EHS Land Use Program (LUP) reviews all water well permit applications (smchealth.org/environ/forms) for public supply, domestic, agricultural, cathodic protection, exploratory, and geothermal heat exchange well construction and destruction and permit applications for all reconnaissance, investigation, and excavation work strictly for land use purposes. Please contact the LUP at (650) 372-6200 to discuss permitting, notification, and drilling requirements.

A 120-day extension may be granted for permits which have not been used during the original 120-day time frame. Submit another Subsurface Drilling Permit Application and payment for the permit extension fee at 50% of the fee for the type of drilling. Extension must be requested prior to the original permit expiring. If there are several wells and borings over several contiguous assessor's parcels and public right-of-ways, then discuss the fee with the County inspector at (650) 464-0047 or drilling@smcgov.org. The County inspector may charge only one fee for borings and wells constructed across contiguous assessor's parcels and public right-of-ways. However, this is dependent on how much the County inspector believes will need to be inspected in the field and how much review time of required submittals will be needed.

Section 1: Purpose of Application

At least one of the four boxes must be selected; however, multiple boxes may be selected as long as all of the wells and borings are on the same assessor's parcel or public right-of-way (see Section 4). A **boring** under this permit application is defined as a constructed hole lasting less than 24 hours before being properly destroyed. After 24 hours, the constructed hole is considered a **well** under this permit application which needs to be constructed appropriately unless special conditions are approved as part of the permit. If permit extension is selected, then write in the permit number of the permit to be extended. List the number of wells and borings anticipated to be drilled and what they will be named. This number may change in the field based on conditions encountered.

Section 2: Purpose of Drilling

At least one of the two boxes must be selected; however, both boxes may be selected as long as both purposes of drilling are to be conducted on the same assessor's parcel or public right-of-way (see Section 4). Geotechnical drilling may also be conducted under San Mateo County's Annual Geotechnical Drilling Permit in which consulting companies pay an annual fee to perform this type of drilling an unlimited amount of times for 365 days after obtaining the Annual Geotechnical Drilling Permit. Fees are listed at smchealth.org/ehfees. Please note, a Notification Form (not available on website) similar to this Subsurface Drilling Permit Application must be completely filled out and submitted at least 2 business days (48 hours) prior to drilling under the Annual Geotechnical Drilling Permit.

Section 3: Lead Agency

One of the three boxes must be selected. The EHS GPP would be selected only for investigations of known contaminated sites that the County is the lead agency. For drilling required by the Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the United States Environmental Protection Agency (USEPA), please include a copy of their approval letter. **None** would refer to investigations required by the County CUPA (Hazardous Materials Program), County Land Use or Solid Waste Programs, County or City Planning or Building Departments or voluntary investigations for due diligence or property transactions.

Section 4: Drilling Information

All applicable spaces must be filled in. **Agency Case #** refers to the lead agency's case number, if overseen by an agency, for the project under which the investigation is being conducted. **Assessor's parcel number** is the 9-digit number corresponding to the specific private property the drilling is proposed to be conducted on (can be found under Secured Property Taxes at sanmateocountytaxcollector.org or [here](#)). Each permit **must** include only one assessor's parcel number. If the drilling is to be conducted only in public right-of-ways, then the assessor's parcel number space should be filled in with N/A for not applicable. If drilling is to occur on both a private property and a contiguous public right-of-way, then two permits (one for the private property and one for the public right-of-way) must be filled out. **Address, City, and Zip** refer to the location of the specific property drilling is proposed to be conducted on. The address for a public right-of-way would simply be the name of the specific section of the public right-of-way (ie. 100 block of Main Street). **To be Constructed in** must have one box selected. Again, this differentiates between a public right-of-way and a private property. **Refuse** is a special land use designation which needs to be indicated on the permit application.

PERMIT APPLICATION INSTRUCTIONS AND FEES (CONTINUED)

Section 4: Drilling Information (continued)

The rest of this section is self-explanatory, may change in the field based on conditions encountered, and must be filled in except **Destruction Method for borings only**. Schematics may be submitted instead of filling in the well construction details, particularly if wells will be constructed differently from each other.

Destruction Method requires the use of a maximum of 7 gallons of water per 94 pounds of cement. This measurement (for both water and cement) must be able to be demonstrated in the field upon request from the inspector (such as using a 5-gallon bucket for measuring the water and using entire bags of cement). For **pressure grouting**, the well construction log and grout calculations must be submitted. The sand pack may not be more than 3 feet above the top of the screened interval, the screened interval may not be longer than 25 feet, and the bottom of the original boring may not be more than 2 feet deeper than the bottom of the constructed well. The total depth of the well and the fact that there are no obstructions in the well must be verified in the field. Type I/II cement grout must be tremied into the well, followed by application of 25 psi pressure maintained for 5 minutes. If the well does not meet pressure grouting criteria, it must be destroyed by drilling out to the total depth of the original boring. For **overdrilling**, the well casing and all annular material must be removed using a guide rod for the entire depth of the well inserted prior to drilling, and the boring tremie grouted to the surface using Type I/II cement grout. A general observation is that grouting borings using a ¾ inch PVC pipe, typically used to collect grab groundwater samples in borings, does not work with a screened section. Free falling grout is only allowed if the boring is dry, or if water is present in less than 10% of the boring, and less than 30 feet deep. Grout calculations must be provided in a well destruction workplan.

Section 5: Well/Boring Owner

The **name** of the entity owning the wells and borings must be listed along with their contact person (if different from the name of the well/boring owner), address, telephone number, and email address. The **contact person** must be directly associated with or an agent of the entity owning the wells and borings such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **phone** number and an **email** address must be provided to allow the inspector to contact the well/boring owner to verify information if necessary. By providing an email address, the well/ boring owner will receive an electronic copy of the permit. The permit application must be **signed** and **dated** by either the entity listed as the owner of the wells and borings or the contact person. **Signatures (Sections 5 through 8)** do not need to be original; however, one copy of the permit application must contain all of the information besides the signatures in a legible format. **ALL SIGNATURES REQUIRED (SECTIONS 5 THROUGH 8) DO NOT NEED TO BE ON THE SAME COPY OF THE PERMIT APPLICATION.**

Section 6: Property Owner

The **name** of the entity owning the property must be listed and needs to match the name listed with the County Assessor for this property. The **contact person** must be directly associated with or an agent of the entity owning the property such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **telephone** number and an **email** address must be provided to allow the inspector to contact the property owner to verify information if necessary. By providing an email address, the property owner will receive an electronic copy of the permit. The permit application must be signed and dated by the entity listed as the property owner only.

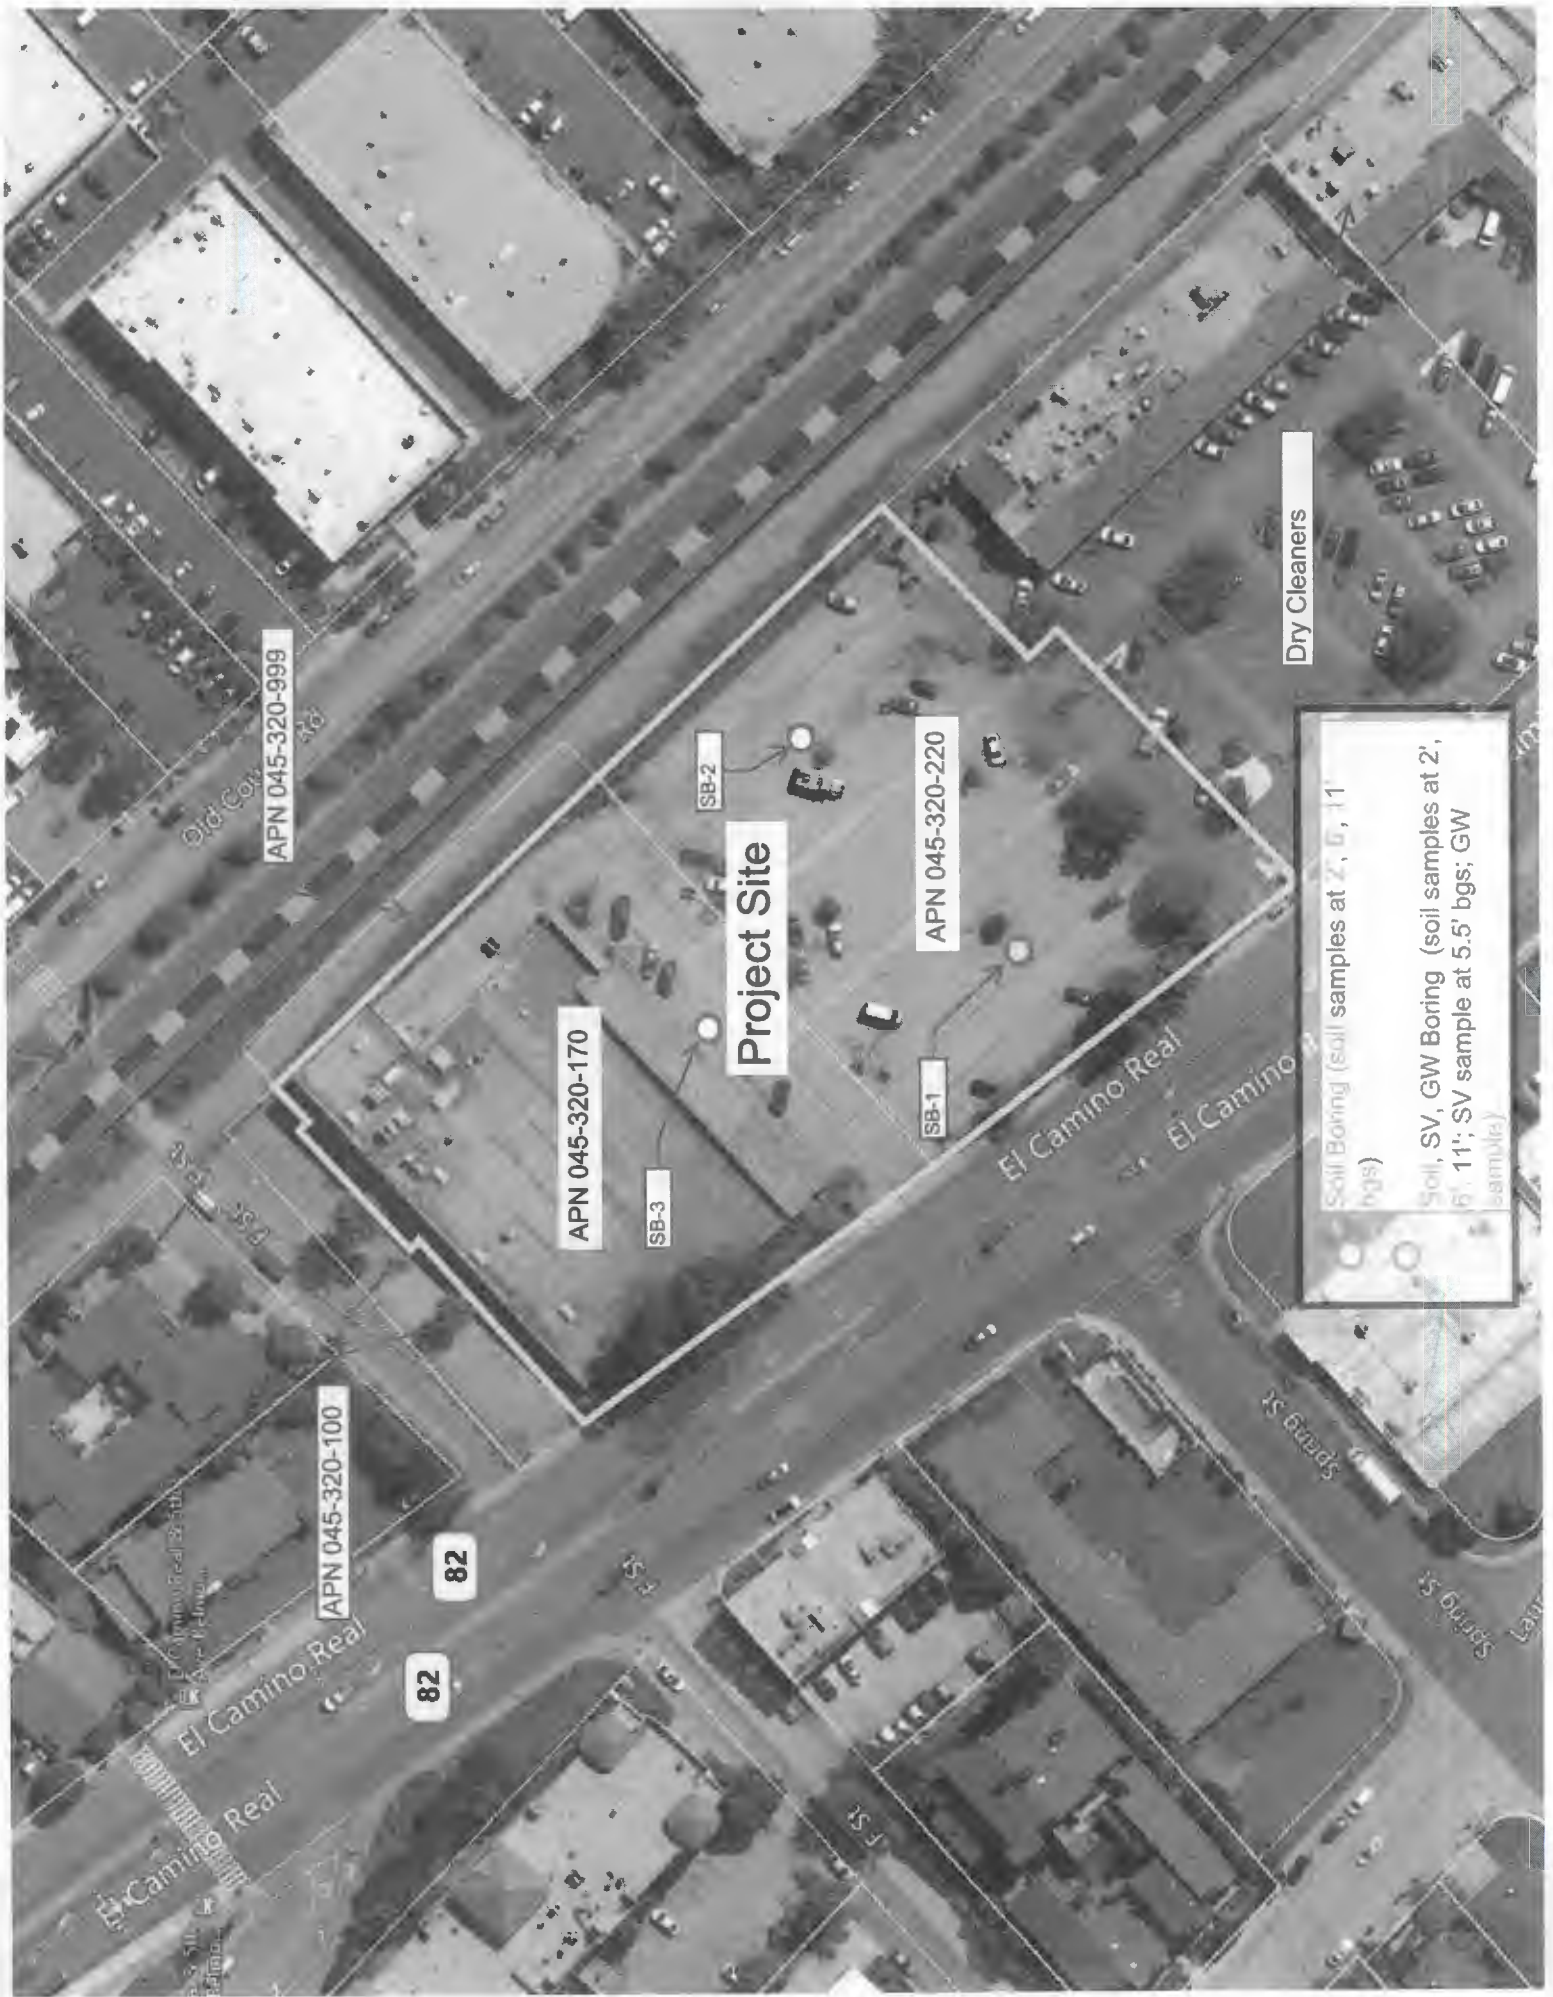

AGENTS CANNOT SIGN FOR THE PROPERTY OWNER. For public rights-of-way, a copy of the encroachment permit can be substituted for the property owner signature. The City of San Mateo, among others, will not issue an encroachment permit until the subsurface drilling permit is issued, but the City of San Mateo will issue a letter of intent to issue an encroachment permit which is acceptable as a substitute for the property owner signature in City of San Mateo rights-of-way.

Section 7: Drilling Company

The **name** of the company proposed to drill the wells and borings must be listed along with the drilling company **contact person, address, phone number, and email address**. In addition, the **driller's C57 license number** must be provided. By providing an email address, the drilling company will receive an electronic copy of the permit. The permit application must be signed and dated by the driller's contact person. If the drilling company changes, then a new subsurface drilling permit application should be filled out completely except for Sections 5, 6, and 8.

Section 8: Consulting Company

The **name** of the company overseeing the proposed drilling of the wells and borings must be listed along with the **project manager, address, phone number, and email address**. The responsible professional overseeing the work must **print** their name legibly, **sign** their name and date, and provide either their **California Professional Geologist or Civil Engineering number**. Field contact name and number, if known, are optional but beneficial for all parties involved.

SUBSURFACE DRILLING PERMIT APPLICATION CHECKLIST

CHECKLIST

- Legibly filled in all appropriate blanks and boxes, except signature and date (review instructions to verify appropriate fields to leave any lines blank or unchecked).
- Have all required signatures (can be on separate pages, do not need to be wet signatures).
- Include appropriate fee with application. Payment can be made by credit card over phone to (650) 372-6200 (indicate when and how application submitted).
- Include scaled site map of site in relation to cross streets and drilling location in relation to site features.
- Show approximate location(s) and ID/Name of well/borings.
- For well installations, indicate (i.e. mark on permit application) anticipated destruction method of these wells. May be asked to provide written description for small diameter (<2") wells.
- For well destructions via pressure grouting, included well construction logs and grout volume calculations. An approved work plan is required for all well destructions.
- Shallow (<10') vapor wells do not need to be permitted. However, still must comply with well standards for installation and destruction (i.e. do not use bentonite alone in vadose zone for sanitary seal and remove all non-native material).
- Notify permitting inspector 2 full working days prior to start of drilling.
Separate notification to case worker if known contaminated site.
- Consultant must submit all required information within 60 days of drilling (preferably to drilling@smcgov.org).
- For Borings and wells: require logs, site map, and analytical data.
- For wells: require surveyed coordinates and elevation, Well Completion Report (or indicate upload to Department of Water Resources Online System of Well Completion Reports DWR's OSWCR).

COMMON MISTAKES TO AVOID ON APPLICATION

Listed **potential** buyer as Property Owner,

Listed case's address rather than drilling location's address.

Failed to include Assessor's Parcel Number of the drilling location.

- Provided variance justification memo if temporary wells/borings may need to be left open for more than 24 hours to wait for groundwater recharge with estimate of maximum time needed.

- Permit is for **one mobilization** only. If work included in this permit cannot be done in a single mobilization, another permit may be required.

- Well owner must submit indication of annual use of wells (monitoring reports in association with corrective action requests satisfies this requirement); otherwise, wells need to be destroyed within year of last originally intended use.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

- Well owner must submit indication of annual use of wells (monitoring reports in association with corrective action requests satisfies this requirement); otherwise, wells need to be destroyed within year of last originally intended use.

- Any application for drilling within a landfill (geotechnical or environmental) must be accompanied by a work plan. Work plans must be approved by San Mateo County Environmental Health Services (EHS) and the Groundwater Protection Program prior to drilling.

SUBSURFACE DRILLING PERMIT APPLICATION

REQUIREMENTS

An accurate and correct map **must** be submitted with the application and include the following: north arrow, existing and historic site features, existing and proposed well/boring locations with ID's to scale, property lines and any other pertinent information. A work plan describing the drilling and construction/destruction methodology **must** be submitted to County staff. A complete application with appropriate fees **must** be submitted 3 working days in advance of drilling and notification of start date and time **must** be provided at least 2 working days prior to drilling. The permit is subject to both General and Special Conditions stated below. A copy of the approved Subsurface Drilling Permit **must** be available on site while work related to the permit is being performed. **Drilling may begin at the notified date and time whether County staff is present or not.**

GENERAL CONDITIONS

- A. **Field notification must be provided to GPP drilling inspection staff at least 2 full working days prior to the start of drilling. GPP Caseworker also must be notified if site is associated with a remedial action case.**
- B. Well and boring construction and destruction under this permit are subject to the Standards for the Construction of Wells in San Mateo County, County Groundwater Protection Program (GPP) Guidelines, Policies & Procedures, the State Water Well Standards, and any instructions by EHS representative.
- C. Well/Boring Owner, Driller, and Responsible Professional assume responsibility for all activities and uses under the permit, including compliance with Workmen's Compensation Laws, and indemnify, defend and save the County of San Mateo, its officers, agents and employees, free and harmless from any and all expense, cost, or liability in connection with or resulting from work or stopped-work associated with the permit, including, but not limited to, property damage, personal injury, wrongful death, and loss of income.
- D. All borings **must** be properly destroyed (grouted/sealed) within 24 hours of drilling, unless special conditions are approved beforehand in writing as part of this permit, and **must** be continuously protected and stabilized.
- E. Analytical results of all soil, vapor, and groundwater samples collected during the execution of drilling under this permit **must** be submitted to County GPP staff by the Responsible Professional within 60 days of sample collection. If contamination is discovered during drilling, verbal notification to County GPP by the Responsible Professional is **required** within 72 hours of discovery. Proper storage, labeling & disposal of investigation-derived residual wastes are the responsibility of the consultant unless stated otherwise contractually.
- F. Boring logs, well construction details, and finalized as-built location map for all borings/ wells (except geotechnical borings) signed by a Responsible Professional, **must** be submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction. DWR Form 188 **must** be filed with the State per water code 13752.
- G. Permit is valid only for the purpose specified herein. No change in purpose or required procedures, as described on this permit application, in the associated workplan, or in the special conditions below, will be allowed except upon written permission from the County. Construction aspects can be changed based on conditions encountered in the field.
- H. **Permit is valid for one mobilization** associated with originally permitted boring/well locations only, including contingency locations, and is automatically canceled if not exercised, or if an extension is not applied for and granted within 120 days of the original permit issuance date. Failure to notify staff of cancellation or delay in start time will result in the Consultant being billed an inspection cancellation fee if GPP staff attempted to perform an inspection. Fees are listed at smchealth.org/ehfees.
- I. Wells installed under this permit may not be used for domestic, municipal, agricultural, or irrigation water supply.
- J. All work performed **must** conform to Business and Profession Codes and State Water Well Standards.
- K. Top-of-casing elevation of all wells **must** be surveyed to the nearest 0.01-foot relative to Mean Sea Level or NAVD88 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate. Geotechnical wells are exempt from this requirement if a written variance from GPP is obtained prior to drilling.
- L. Latitude and longitude of all wells **must** be surveyed with sub-meter accuracy relative to NAD83 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate.
- M. Violation of any requirement or general or special permit condition may result in an order by GPP staff to cease work under this permit, correct the violation, potentially re-permit the work as a new mobilization, and potential actions may be taken against the Well Owner, Property Owner, or Responsible Professional by GPP.

PERMIT APPLICATION INSTRUCTIONS AND FEES

A subsurface drilling permit for borings and wells is required if groundwater is anticipated to be encountered or if drilling extends to 10 feet or deeper. Sub-slab and vapor wells shallower than 10 feet do not require a permit. Should groundwater be encountered shallower than 10 feet unexpectedly, then contact San Mateo County EHS Groundwater Protection Program (GPP) immediately and a permit application will be required retroactively. GPP is the permitting agency for all subsurface drilling for environmental and geotechnical purposes within San Mateo County. San Mateo County EHS Land Use Program (LUP) reviews all water well permit applications (smchealth.org/enviro/forms) for public supply, domestic, agricultural, cathodic protection, exploratory, and geothermal heat exchange well construction and destruction and permit applications for all reconnaissance, investigation, and excavation work strictly for land use purposes. Please contact the LUP at (650) 372-6200 to discuss permitting, notification, and drilling requirements.

A 120-day extension may be granted for permits which have not been used during the original 120-day time frame. Submit another Subsurface Drilling Permit Application and payment for the permit extension fee at 50% of the fee for the type of drilling. Extension must be requested prior to the original permit expiring. If there are several wells and borings over several contiguous assessor's parcels and public right-of-ways, then discuss the fee with the County inspector at (650) 464-0047 or drilling@smcgov.org. The County inspector may charge only one fee for borings and wells constructed across contiguous assessor's parcels and public right-of-ways. However, this is dependent on how much the County inspector believes will need to be inspected in the field and how much review time of required submittals will be needed.

Section 1: Purpose of Application

At least one of the four boxes must be selected; however, multiple boxes may be selected as long as all of the wells and borings are on the same assessor's parcel or public right-of-way (see Section 4). A **boring** under this permit application is defined as a constructed hole lasting less than 24 hours before being properly destroyed. After 24 hours, the constructed hole is considered a **well** under this permit application which needs to be constructed appropriately unless special conditions are approved as part of the permit. If permit extension is selected, then write in the permit number of the permit to be extended. List the number of wells and borings anticipated to be drilled and what they will be named. This number may change in the field based on conditions encountered.

Section 2: Purpose of Drilling

At least one of the two boxes must be selected; however, both boxes may be selected as long as both purposes of drilling are to be conducted on the same assessor's parcel or public right-of-way (see Section 4). Geotechnical drilling may also be conducted under San Mateo County's Annual Geotechnical Drilling Permit in which consulting companies pay an annual fee to perform this type of drilling an unlimited amount of times for 365 days after obtaining the Annual Geotechnical Drilling Permit. Fees are listed at smchealth.org/ehfees. Please note, a Notification Form (not available on website) similar to this Subsurface Drilling Permit Application must be completely filled out and submitted at least 2 business days (48 hours) prior to drilling under the Annual Geotechnical Drilling Permit.

Section 3: Lead Agency

One of the three boxes must be selected. The EHS GPP would be selected only for investigations of known contaminated sites that the County is the lead agency. For drilling required by the Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the United States Environmental Protection Agency (USEPA), please include a copy of their approval letter. **None** would refer to investigations required by the County CUPA (Hazardous Materials Program), County Land Use or Solid Waste Programs, County or City Planning or Building Departments or voluntary investigations for due diligence or property transactions.

Section 4: Drilling Information

All applicable spaces must be filled in. **Agency Case #** refers to the lead agency's case number, if overseen by an agency, for the project under which the investigation is being conducted. **Assessor's parcel number** is the 9-digit number corresponding to the specific private property the drilling is proposed to be conducted on (can be found under Secured Property Taxes at sanmateocountytaxcollector.org or [here](#)). Each permit **must** include only one assessor's parcel number. If the drilling is to be conducted only in public right-of-ways, then the assessor's parcel number space should be filled in with N/A for not applicable. If drilling is to occur on both a private property and a contiguous public right-of-way, then two permits (one for the private property and one for the public right-of-way) must be filled out. **Address, City, and Zip** refer to the location of the specific property drilling is proposed to be conducted on. The address for a public right-of-way would simply be the name of the specific section of the public right-of-way (ie. 100 block of Main Street). **To be Constructed In** must have one box selected. Again, this differentiates between a public right-of-way and a private property. **Refuse** is a special land use designation which needs to be indicated on the permit application.

PERMIT APPLICATION INSTRUCTIONS AND FEES (CONTINUED)

Section 4: Drilling Information (continued)

The rest of this section is self-explanatory, may change in the field based on conditions encountered, and must be filled in except **Destruction Method for borings only**. Schematics may be submitted instead of filling in the well construction details, particularly if wells will be constructed differently from each other.

Destruction Method requires the use of a maximum of 7 gallons of water per 94 pounds of cement. This measurement (for both water and cement) must be able to be demonstrated in the field upon request from the inspector (such as using a 5-gallon bucket for measuring the water and using entire bags of cement). For **pressure grouting**, the well construction log and grout calculations must be submitted. The sand pack may not be more than 3 feet above the top of the screened interval, the screened interval may not be longer than 25 feet, and the bottom of the original boring may not be more than 2 feet deeper than the bottom of the constructed well. The total depth of the well and the fact that there are no obstructions in the well must be verified in the field. Type I/II cement grout must be tremied into the well, followed by application of 25 psi pressure maintained for 5 minutes. If the well does not meet pressure grouting criteria, it must be destroyed by drilling out to the total depth of the original boring. For **overdrilling**, the well casing and all annular material must be removed using a guide rod for the entire depth of the well inserted prior to drilling, and the boring tremie grouted to the surface using Type I/II cement grout. A general observation is that grouting borings using a ¾ inch PVC pipe, typically used to collect grab groundwater samples in borings, does not work with a screened section. Free falling grout is only allowed if the boring is dry, or if water is present in less than 10% of the boring, and less than 30 feet deep. Grout calculations must be provided in a well destruction workplan.

Section 5: Well/Boring Owner

The **name** of the entity owning the wells and borings must be listed along with their contact person (if different from the name of the well/boring owner), address, telephone number, and email address. The **contact person** must be directly associated with or an agent of the entity owning the wells and borings such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **phone number** and an **email address** must be provided to allow the inspector to contact the well/boring owner to verify information if necessary. By providing an email address, the well/ boring owner will receive an electronic copy of the permit. The permit application must be **signed and dated** by either the entity listed as the owner of the wells and borings or the contact person. **Signatures (Sections 5 through 8)** do not need to be original; however, one copy of the permit application must contain all of the information besides the signatures in a legible format. **ALL SIGNATURES REQUIRED (SECTIONS 5 THROUGH 8) DO NOT NEED TO BE ON THE SAME COPY OF THE PERMIT APPLICATION.**

Section 6: Property Owner

The **name** of the entity owning the property must be listed and needs to match the name listed with the County Assessor for this property. The **contact person** must be directly associated with or an agent of the entity owning the property such as a property manager, real estate manager, contractor, or lawyer but not the environmental consultant listed on the permit application in Section 8. A **telephone number** and an **email address** must be provided to allow the inspector to contact the property owner to verify information if necessary. By providing an email address, the property owner will receive an electronic copy of the permit. The permit application must be signed and dated by the entity listed as the property owner only. **AGENTS CANNOT SIGN FOR THE PROPERTY OWNER.** For public rights-of-way, a copy of the encroachment permit can be substituted for the property owner signature. The City of San Mateo, among others, will not issue an encroachment permit until the subsurface drilling permit is issued, but the City of San Mateo will issue a letter of intent to issue an encroachment permit which is acceptable as a substitute for the property owner signature in City of San Mateo rights-of-way.

Section 7: Drilling Company

The **name** of the company proposed to drill the wells and borings must be listed along with the drilling company **contact person, address, phone number, and email address**. In addition, the **driller's C57 license number** must be provided. By providing an email address, the drilling company will receive an electronic copy of the permit. The permit application must be signed and dated by the driller's contact person. If the drilling company changes, then a new subsurface drilling permit application should be filled out completely except for Sections 5, 6, and 8.

Section 8: Consulting Company

The **name** of the company overseeing the proposed drilling of the wells and borings must be listed along with the **project manager, address, phone number, and email address**. The responsible professional overseeing the work must **print** their name legibly, **sign** their name and date, and provide either their **California Professional Geologist or Civil Engineering** number. Field contact name and number, if known, are optional but beneficial for all parties involved.

Lab Job Number: 444780
Project No: 30084302.00002
Location: II El Camino Real
Date Received: 04/30/21

This data package contains sample and QC results for nine soil samples, requested for the above referenced project on 05/03/21. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015M):

Low recovery was observed for diesel C10-C28 in the LCS for batch 266394; the low recovery was not associated with any reported results. Low recoveries were observed for diesel C10-C28 in the MS/MSD for batch 266394; the parent sample was not a project sample, and these low recoveries were not associated with any reported results. High RPD was also observed for diesel C10-C28; the high RPD was not associated with any reported results. Low surrogate recoveries were observed for n-triacontane in the LCS/MS/MSD for batch 266394. No other analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

Semivolatile Organics by GC/MS (EPA 8270C):

A number of samples were diluted due to the dark color of the sample extracts. SB-1-2 (lab # 444780-001) was diluted due to the dark and viscous nature of the sample extract. No other analytical problems were encountered.

Semivolatile Organics by GC/MS SIM (EPA 8270C-SIM):

High response was observed for benzo(g,h,i)perylene in the CCV analyzed 05/03/21 10:07; affected data was qualified with "b". Many samples were diluted due to the dark color of the sample extracts. SB-1-2 (lab # 444780-001) was diluted due to the dark and viscous nature of the sample extract. No other analytical problems were encountered.

Pesticides (EPA 8081A):

Low recoveries were observed for endosulfan sulfate and methoxychlor in the MSD of SB-1-2 (lab # 444780-001); the LCS was within limits. High recoveries were observed for a number of analytes in the MS/MSD of SB-1-2 (lab # 444780-001); the LCS was within limits, and these analytes were not detected at or above the RL in the associated samples. High RPD was observed for many analytes; these analytes were not detected at or above the RL in the associated samples. SB-1-2 (lab # 444780-001), SB-2-2 (lab # 444780-004), and SB-3-2 (lab # 444780-007) were diluted due to the dark color of the sample extracts. No other analytical problems were encountered.

PCBs (EPA 8082):

High RPD was observed for Aroclor-1260 in the MS/MSD of SB-1-2 (lab # 444780-001). No other analytical problems were encountered.

Metals (EPA 6010B and EPA 7471A) Soil:

Low recoveries were observed for antimony in the MS/MSD for batch 266373; the parent sample was not a project sample, the LCS was within limits, and the associated RPD was within limits. No other analytical problems were encountered.

Metals (EPA 6010B) TCLP Leachate:

No analytical problems were encountered.

Metals (EPA 6010B) WET Leachate:

No analytical problems were encountered.

Asbestos by PLM (Asbestos PLM):

SGS Forensic in Hayward, CA performed the analysis (not NELAP certified). Please see the SGS Forensic case narrative.

Asbestos by PLM (EPA 600/R-93-116):

SGS Forensic in Hayward, CA performed the analysis (not NELAP certified). Please see the SGS Forensic case narrative.

SAMPLE ACCEPTANCE CHECKLIST

Section 1
 Client: Arcadis Project: II El Camino Real
 Date Received: 05/01/2021 Sampler's Name Present: Yes No

Section 2
 Sample(s) received in a cooler? Yes, How many? 1 No (skip section 2) Sample Temp (°C) (No Cooler) : _____
 Sample Temp (°C), One from each cooler: #1: 3.6 #2: _____ #3: _____ #4: _____
(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)
 Shipping Information: _____

Section 3
 Was the cooler packed with: Ice Ice Packs Bubble Wrap Styrofoam
 Paper None Other _____
 Cooler Temp (°C): #1: 2.5 #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>		
Are sample IDs present?	<input checked="" type="checkbox"/>		
Are sampling dates & times present?	<input checked="" type="checkbox"/>		
Is a relinquished signature present?	<input checked="" type="checkbox"/>		
Are the tests required clearly indicated on the COC?	<input checked="" type="checkbox"/>		
Are custody seals present?		<input checked="" type="checkbox"/>	
If custody seals are present, were they intact?			<input checked="" type="checkbox"/>
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)	<input checked="" type="checkbox"/>		
Did all samples arrive intact? If no, indicate in Section 4 below.	<input checked="" type="checkbox"/>		
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>		
Were the samples collected in the correct containers for the required tests?	<input checked="" type="checkbox"/>		
Are the containers labeled with the correct preservatives?	<input checked="" type="checkbox"/>		
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			<input checked="" type="checkbox"/>
Was a sufficient amount of sample submitted for the requested tests?	<input checked="" type="checkbox"/>

Richard,
Can you please run TCLP analysis for the following samples:
SB-1-6' Nickel
SB-2-6' Lead
SB-2-10' Nickel

We will need the results by COB 5/14.

Thank you,

Richard,

We also will need to run the following samples:

STLC for Chromium

- SB-1- 10'
- SB-2- 2', -6' and -10'
- SB-3- 6'

STLC for Nickel

- SB-1-6'

Thank you,

Tad Thrower, Laboratory Supervisor, Hayward Laboratory

Note: Limit of Quantification ('LOQ') = 1%. 'Trace' denotes the presence of asbestos below the LOQ. 'ND' = 'None Detected'.

Analytical results and reports are generated by SGS Forensic Laboratories (SGSFL) at the request of and for the exclusive use of the person or entity (client) named on such report. Results, reports or copies of same will not be released by SGSFL to any third party without prior written request from client. This report applies only to the sample(s) tested. Supporting laboratory documentation is available upon request. This report must not be reproduced except in full, unless approved by SGSFL. The client is solely responsible for the use and interpretation of test results and reports requested from SGSFL. SGSFL is not able to assess the degree of hazard resulting from materials analyzed. SGS Forensic Laboratories reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified. All samples were received in acceptable condition unless otherwise noted.

5/5/2021

Mr. Justin Sobieraj
Arcadis U.S., Inc.
101 Creekside Ridge Court
Suite 200
Roseville CA 95678

Project Name: 11 El Camino Real
Project #: 30084302
Workorder #: 2105022A

Dear Mr. Justin Sobieraj

The following report includes the data for the above referenced project for sample(s) received on 5/4/2021 at Eurofins Air Toxics LLC.

The data and associated QC analyzed by TO-15 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics LLC. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Monica Tran at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Monica Tran
Project Manager

LABORATORY NARRATIVE
EPA Method TO-15
Arcadis U.S., Inc.
Workorder# 2105022A

Two 1 Liter Summa Canister samples were received on May 04, 2021. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

All Quality Control Limit exceedances and affected sample results are noted by flags. Each flag is defined at the bottom of this Case Narrative and on each Sample Result Summary page.

Definition of Data Qualifying Flags

Ten qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

M - Reported value may be biased due to apparent matrix interferences.

CN - See Case Narrative.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Roseville CA 95678

Project Name: 11 El Camino Real
Project #: 30084302
Workorder #: 2105022B

Dear Mr. Justin Sobieraj

The following report includes the data for the above referenced project for sample(s) received on 5/4/2021 at Eurofins Air Toxics LLC.

The data and associated QC analyzed by Modified ASTM D-1946 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics LLC. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Monica Tran at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Monica Tran
Project Manager

LABORATORY NARRATIVE
Modified ASTM D-1946
Arcadis U.S., Inc.
Workorder# 2105022B

Two 1 Liter Summa Canister samples were received on May 04, 2021. The laboratory performed analysis via Modified ASTM Method D-1946 for Helium in air using GC/TCD. The method involves direct injection of 1.0 mL of sample.

Method modifications taken to run these samples are summarized in the table below. Specific project requirements may over-ride the EATL modifications.

<i>Requirement</i>	<i>ASTM D-1946</i>	<i>ATL Modifications</i>
Calibration	A single point calibration is performed using a reference standard closely matching the composition of the unknown.	A minimum of 5-point calibration curve is performed. Quantitation is based on average Response Factor.
Reference Standard	The composition of any reference standard must be known to within 0.01 mol % for any component.	The standards used by ATL are blended to a $\geq 95\%$ accuracy.
Sample Injection Volume	Components whose concentrations are in excess of 5 % should not be analyzed by using sample volumes greater than 0.5 mL.	The sample container is connected directly to a fixed volume sample loop of 1.0 mL on the GC. Linear range is defined by the calibration curve. Bags are loaded by vacuum.
Normalization	Normalize the mole percent values by multiplying each value by 100 and dividing by the sum of the original values. The sum of the original values should not differ from 100% by more than 1.0%.	Results are not normalized. The sum of the reported values can differ from 100% by as much as 15%, either due to analytical variability or an unusual sample matrix.
Precision	Precision requirements established at each concentration level.	Duplicates should agree within 25% RPD for detections > 5 X's the RL.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

There were no analytical discrepancies.

Definition of Data Qualifying Flags

Seven qualifiers may have been used on the data analysis sheets and indicate as follows:

B - Compound present in laboratory blank greater than reporting limit.

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the detection limit.

M - Reported value may be biased due to apparent matrix interferences.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Summary of Detected Compounds
NATURAL GAS ANALYSIS BY MODIFIED ASTM D-1946

Client Sample ID: SVP-1

Lab ID#: 2105022B-01A

No Detections Were Found.

Client Sample ID: DUP-1

Lab ID#: 2105022B-02A
